

# Offset every shipment.

*At zero cost to you.*

In partnership with One Tree Planted, Freight Club plants trees in the United States to offset 100% of the CO2 emissions from shipping. The best part? **It's free.**

## What is carbon offsetting?

Offsetting emissions means balancing the emissions released. We offset CO2 by using the GHG Protocol<sup>1</sup> to calculate our emissions and then balance that impact by planting trees, a carbon absorption method.

<sup>1</sup> The GHG Protocol is a trusted source for calculating carbon emissions used by 95% of Fortune 500 companies.

## Why trees?

Trees are nature's superheroes. They clean the air and water from pollutants like CO2, prevent disasters caused by erosion, and are homes to countless species. They really are *that* important!

## Where we plant

We work with One Tree Planted to support reforestation efforts in California, where over 4 million acres of forest were lost during the 2017 and 2020 wildfires.

## Did you know?

In one year, a mature tree will absorb up to 48 lbs of CO2 from the atmosphere.<sup>2</sup>

## Our partners

One Tree Planted is a 501 (c) (3) not-for-profit with a mission to help global reforestation efforts. With an emphasis on educating the public on the importance of trees, One Tree Planted has responsibly planted and maintained over 15 million trees worldwide.

## Is there a cost?

Everything you ship through Freight Club is automatically offset for **free!**
