

# The marketplace that helps you do more

Schneider FreightPower is an online marketplace that gives instant access to reliable capacity and quality freight. Both carriers and shippers experience the power of a unified technology system that seamlessly integrates the right tools to help overcome their unique transportation challenges and maximize results.

## Schneider FreightPower for shippers

Schneider FreightPower helps shippers of all sizes instantly find flexible capacity – backed by a trusted carrier – through an all-in-one online marketplace. By getting instant access to the technology they need most, shippers can get results that make their businesses stronger.

### Harnessing the power of Schneider FreightPower

- **Seamless shipping experience:** Schneider connects shippers to carriers with capacity more quickly and effectively, eliminating unnecessary wait time.
- **Access to capacity:** Customers can expand scale, network and technology to move freight more efficiently than before.
- **Optimized supply chain:** Schneider combines advanced analytics and personalized expertise to optimize a shipper's supply chain.
- **Safety first and always:** Ship with confidence knowing Schneider's registered carriers are backed by rigorous safety and performance standards.

## Schneider FreightPower for carriers

The Schneider FreightPower online marketplace provides carriers with easy access to reliable freight. Available through both an online portal and mobile app, carriers spend less time searching for loads worth hauling and more time managing their business for maximum results.

### Harnessing the power of Schneider FreightPower

- **Reliable, quality freight:** Get unmatched access to quality freight from blue-chip shippers.
- **Save time:** Spend less time searching for loads and get up to three hours back in the day to help maximize business results.
- **Say “yes” more often:** Receive unprecedented access to a vast network of shippers and find more freight at sustainable, fair pricing.
- **Safety first and always:** Drive with confidence knowing Schneider supports its registered carriers through an ongoing commitment to safety and equipment maintenance.

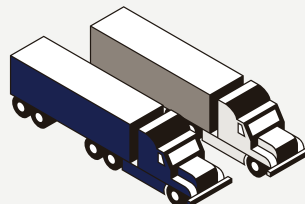

## Schneider FreightPower for shippers

Shippers get more time back in their day with instant access to the tools and features needed most for seamless freight management:

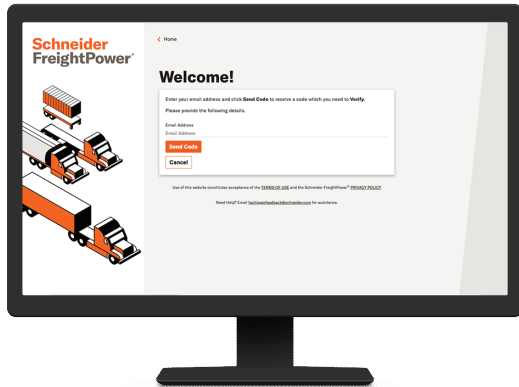

- **Instant quotes:** Real-time, less-than-truckload and truckload freight they book themselves.
- **Instant booking:** Immediately book less-than-truckload and truckload freight and eliminate time spent negotiating.
- **Real-time tracking:** Know where freight is at all times with real-time updates for all loads (except dray and SCM).
- **Key shipping documents:** On-demand access to all shipping documents in one place.
- **Personalized reporting:** Develop customized reports for ongoing supply chain management.
- **Order notifications:** Create order notifications for pickup and delivery.
- **Push notifications:** Receive push notifications for at-risk freight.
- **Favorite orders:** Save and modify order favorites, including locations, commodities and contacts.

## Schneider FreightPower for carriers

Carriers drive their business forward with access to programs and tools such as:

- **More payment options:** TriumphPay and Transflo accelerate transactions, expedite third-party carrier payments and increase flexibility of fund transfer.
- **Fuel and maintenance programs:** Save time and money with access to roadside assistance and fuel surcharge programs, as well as perks such as discounts on fuel, tires and parts.
- **Load recommendations:** Recommendations are based on available trucks, lanes posted and pending inbound shipments.
- **Book Now:** Negotiation-free prices are published with available, reliable loads, allowing carriers to book the load immediately.
- **GPS tracking:** Freight visibility is real time, all the time, with GPS tracking, geofencing and automatic arrival and departure notices.
- **Manage fleet:** Dispatchers can assign drivers to loads and manage the fleet in this one-stop-shop portal, while drivers can accept and track loads.
- **Trip information:** Direct visibility to location, routes, references, appointments, equipment and trailer information is in one place, eliminating time spent waiting on a broker.

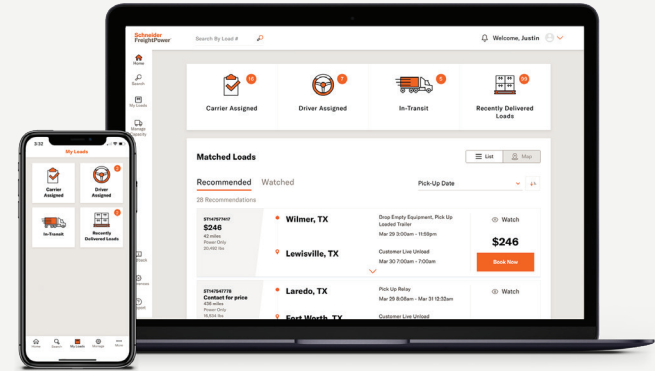

Two ways shippers can access the tools they need for instant freight management:

**Online portal:** Shippers interested in Schneider FreightPower can register for an account and then receive instant access to quoting, booking and managing freight.

**API connection:** Customers with a qualified TMS (transportation management system) may be eligible to connect to Schneider FreightPower via API. This functionality allows shippers to view important information in one location to help make data-driven decisions to their supply chain, and quote and book freight faster.
