project44

Attaining Advanced Visibility with project44

Know exactly where a shipment is, and what condition it's in, during every step of the journey. project44 connects, automates and provides visibility into key transportation processes to accelerate insights and shorten the time it takes to turn those insights into actions. The Advanced Visibility Platform™ enables you and your customers to make smart, real-time decisions rooted in high-fidelity data and predictive business intelligence.

p44's Global Network Includes:

800+
Global telematics ELD device integrations

8.5M+
Access to over 8.5M vehicles worldwide

165+
Coverage in over 165 countries

60+
TMS integrations and partnerships

Our Solutions Are Designed for the Entire Logistics Ecosystem

Shippers
Access real-time tracking and ETAs to improve inventory predictability, reduce On Time In Full (OTIF) fines, eliminate inefficiencies and strengthen customer satisfaction.

Logistics Service Providers
Rapidly meet your automation goals without a high-cost custom solution, increasing efficiencies from procurement through settlement and reducing customer churn.

Carriers
Book and retain more business through digitalization. We partner with you to keep drivers on the road, eliminate manual check calls and increase customer satisfaction.

Our Platform Is Trusted by Leading Global Brands and Logistics Service Providers

Our Advanced Visibility Platform™

Legacy systems cannot deliver the results that today's customer-centric businesses are measured by. project44 takes a data-first approach to visibility with a modern platform designed to ingest, cleanse, and normalize high-quality data from a global network of carriers.

Largest Global Network
Achieve a new level of insight using the only supply chain visibility platform designed to capture the most timely and high-fidelity transportation data via APIs and global ELD/telematics devices.

High-Quality Data
Our platform automates the complex task of consolidating, cleansing, normalizing and enriching all data into a format everyone can understand and act on.

Robust API Services
Our API-centric approach allows p44 to seamlessly integrate to the systems you rely on every day—without any lag time—to ensure your team, suppliers, customers and carriers have a single source of truth.

Purpose Built Applications
Applications, including the Visibility Operations Center™ and the Network Management Center®, are built on top of the platform delivering rapid results in step with your business needs.

Global Reach Across Modes and Geographies

Increase your time to value by tapping into the most extensive global visibility network, which includes access to the only application that fully automates carrier onboarding.

Truckload
Proactively track all truck types across North America and Europe, including refrigerated freight.

LTL, vLTL, & Groupage
Fully automate the entire less-than-truckload shipment lifecycle from procurement through settlement in North America and gain high-fidelity tracking data into groupage shipments in Europe.

Ocean
Container- and vessel-level data for ocean freight around the globe – no matter the port of origin or destination.

Parcel
Connect with all leading global parcel capacity providers, with over 115 major market and regional carriers worldwide directly connected via API.

Final Mile
Automate the home delivery of bulky, non-conveyable products via connections to a variety of North American final mile carriers.

Rail
Track class I, II, and III North American rail shipments.

Air
Built in connections with more than 100 air freight carriers around the world.

Quick Implementation with Expert Help at Every Stage

The sooner you're live, the quicker you'll deliver a better customer experience and gain operational improvements. To help you efficiently implement project44, we offer:

- ⊘ An automated onboarding application with 80% of new carriers connecting in fewer than 10 days.
- ⊘ Exceptional support in over 16 languages available, including Spanish, French, and Polish.
- ⊘ Continuous support from a dedicated Customer Success manager.
- ⊘ Hands-on implementation overseen by a dedicated project manager.
