

Rose Rocket TMS – for Brokers & 3PLs

The Rose Rocket TMS is a transportation management software that helps manage the unique needs of today's brokers and 3PLs. From quote to cash, it is the single piece of software that any broker or 3PL needs to effectively run and scale their business while improving customer experience.

SINGLE SOURCE OF TRUTH FOR ORDERS

Every activity, message, and document is automatically associated to an order so no details slip through the cracks.

IMPROVE SHIPPER EXPERIENCE

Better serve your shippers by giving them their own private and secure Shipper Portal where they can create orders, track shipments, and upload documents.

INTEGRATION-READY

Integrate directly with the business software you need for your business, or connect to customers, partners, and systems with our open API and EDI library.

Easily Manage Orders

You can see, filter, tag, and manage all your orders. Repeated orders can be templated for easy order entry.

Flexible Tariffs

Customize a tariff to be a cost or customer-direct tariff, while being able to adjust tariffs on a customer by customer basis.

Invoices & Billing

Delight your shippers with consolidated invoices. Export invoices to accounting softwares with just a few clicks.

Live Chat In Order

Chat in the context of an order with your team or even with your shippers who have Shipper Portal.

Automatic Updates

Minimize back-and-forth by sending order ETAs automatically to shippers before they ask for it.

Manage Digital Documents

Store and share all the documents you need in one place, including BOLs and invoices & bills.

Improve Customer Experience with **Rose Rocket Shipper Portal**

The Rose Rocket Shipper Portal is the single piece of software you can give to your customers to drastically improve customer experience.

Your customers can create and manage orders, track and trace shipments, and have more visibility into their freight in real time.

Key Features at a Glance

Track & Trace

Shippers can check in on order statuses and real-time location, when they want, where they want.

Create & Submit Orders

Shippers can create orders in less than 30 seconds with features like "Duplicate Orders" and an in-app Google Search.

Get Rates & Spot Quote

Shippers can find rates or request for spot quotes for a shipment.

Chat Online

Shippers can live-chat with your team, with each chat log linked to an individual order.

Manage Documents

Upload and download any document related to an order at any time.

Email Notifications

Have status changes emailed to shippers for their convenience.

"We've been doubling our business, and Rose Rocket feels like a partner to us."

Greg Cox, President & CEO, Beech Hill Logistics
