

TURVO APPOINTMENT SCHEDULING

Balance Labor Workloads and Streamline Dock Management with Online Booking

Spend 90% Less Time on Manual Scheduling, Improve Carrier and Customer Experience, and Cut Transportation Cost and Detention Fees Using a Single, Integrated, Automated Solution

Managing warehouse appointment-scheduling the 'old' way – via manual spreadsheets, phone calls and emails – can be expensive, complex and rife with errors. With dozens, if not hundreds of pickups and deliveries cruising in and out of a facility on any given day, it's easy for schedules to fall apart quickly. Just one delay can backflow into many hours lost, throwing work shifts out of balance, reputations into question and money down the drain.

Can you really afford to keep working this way? Wouldn't it be easier if you could get everyone on the same page, using a common scheduling interface that automates the process? Manages communications? Streamlines check-in and check-out? And updates changes automatically, in real-time, with self-service booking enabled, as well?

Welcome Turvo Appointment Scheduling, the automated, most efficient way to manage warehouse dock interactions.

Restore Efficiency and Profitability with Turvo Appointment Scheduling

Turvo Appointment Scheduling represents a suite of automated tools and processes that help you manage interaction with trucks arriving at your warehouse facility. The platform conveniently digitizes scheduling operations and balances labor workloads, without traditional error-prone, hands-on interactions. And, its public scheduling capabilities enable self-service bookings, so your carriers and drivers can schedule appointments directly into your calendar, no logins required. Get ready for an easier way to schedule dock appointments.

Take a closer look at Turvo Appointment Scheduling.

Turvo Appointment Scheduling At-a-Glance:

-  Frees warehouse staff from manual appointment scheduling.
-  Provides carriers online access to scheduling calendars without login requirements.
-  Automatically updates schedule changes in real-time.
-  Displays every appointment on the books, enterprise-wide, via a single source of truth.
-  Customizable rules engine helps maintain preferred carrier and customer relations.
-  Offers every user a more satisfying, digital experience.
-  Helps you work smarter, save time and save money.

Improve Carrier, Driver and Partner Experience with Turvo Appointment Scheduling

Turvo Appointment Scheduling was created to help warehouse managers effectively plan labor requirements that directly impact efficiency and profitability at the facility. It frees front office workers from having to manually schedule appointments with external parties and helps warehouse personnel more efficiently receive and ship products from the facility, knowing the exact labor requirements for every shift.

With Turvo Appointment Scheduling, you can:

- 
See the Full Schedule in Context
 Including order, shipment, customer and carrier by appointment slot for every shipment in your network.
- 
Capture Truck Status
 Reducing confusion and keeping everyone informed – in real-time.
- 
Track Arrivals and Departures in Real-Time
 Spotting delays before they occur for improved dock and yard management.
- 
Enable Self-Service Booking
 Giving partners control over appointment scheduling for reduced stress and less risk of bottlenecks in the yard and dock.

In addition, because Turvo Appointment Scheduling is an integral part of Turvo’s cloud-based suite of collaborative logistics solutions, it works naturally with Turvo Driver, our GPS-enabled mobile application that helps drivers eliminate manual paperwork, simplify scheduling, and streamline gate check-in for contactless deliveries managed directly over any mobile device.

Everything You Need to Modernize Dock Management Now

Turvo Appointment Scheduling integrates easily with third-party systems, providing full access to OTR and multimodal shipments for rapid customer assignments, with accurate rates and shipment data applied.

Identify exactly what equipment is needed to complete the job, reduce missed pickups and deliveries, set customer appointment rules and keep everyone in your supply chain informed with automated document sharing.

Ask for a Demonstration and Put Turvo Appointment Scheduling to Work for You

With Turvo Appointment Scheduling, you’ll soon be able to automate your dock scheduling, reduce congestion at traffic-heavy warehouses, eliminate dwell time and detention fees, and continuously save resources.
