

# Had enough of lackluster returns on your logistics and technology investments?

# REDWOOD<sup>®</sup> LPaaS

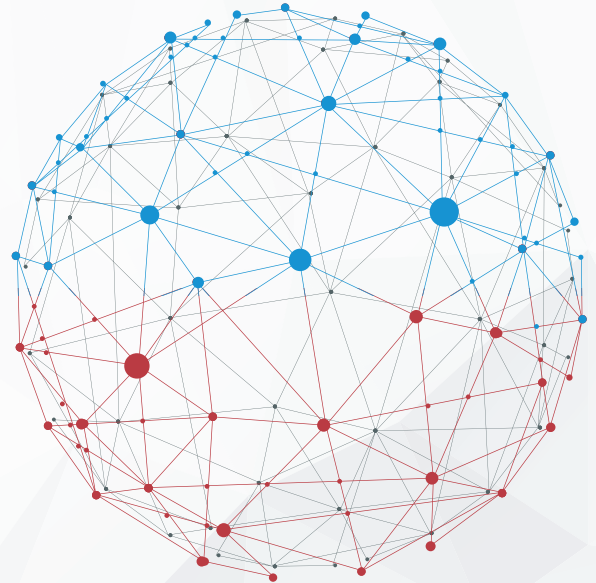

LOGISTICS PLATFORM AS A SERVICE

Redwood's innovative Logistics Platform as a Service (LPaaS™) approach bridges the gap between your logistics and technology to deliver an open, collaborative, productive, low-risk way to mix and match the right physical and digital solutions that fit your business; all while delivering superior value for your business.

As the binding agent between logistics and tech, LPaaS enables you to create a harmonized network for plug and play on-demand logistics delivering unmatched **optionality, control** and **profitability**.

LPaaS is the open platform for digital logistics.

**Just connect to WIN.**

## Why choose LPaaS?

### UNIFY YOUR ENTIRE NETWORK

Connects ALL your logistics services and digital tools with RedwoodConnect, our proprietary integration platform as a service (iPaaS) for total end-to-end visibility and control.

### BUILD LOGISTICS YOUR WAY

Mix and match your preferred freight services, partners and digital tools to create a logistics network best for your business.

### IMPLEMENT TECHNOLOGY WITH EASE

Integrate new tech solutions without the headaches or high costs with our platform services team.

### LOWER YOUR COST TO SERVE

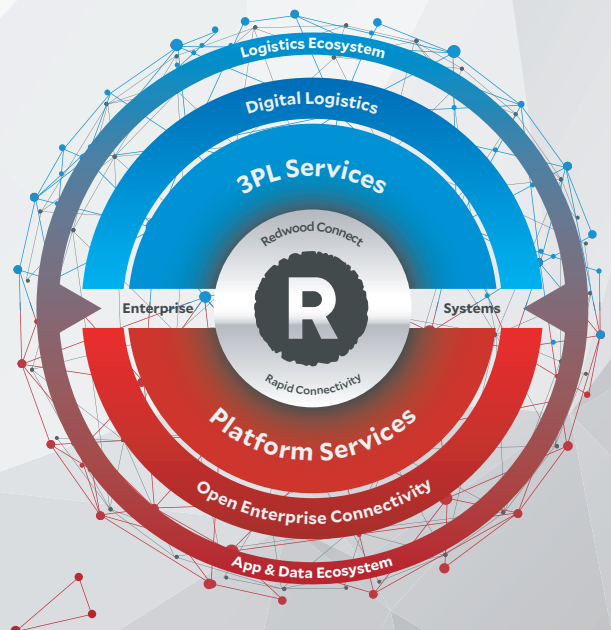

More automated workflows will increase efficiency, lower manual touchpoints and reduce your operating spend.

### MAKE INFORMED BUSINESS DECISIONS

Unlock and transfer data seamlessly to get real-time business analytics to make data-driven strategy decisions.

### REDUCE YOUR FREIGHT SPEND

Work with our managed services and consulting teams to optimize your entire operation to lower freight spend with the right solutions tailored to your organization.
