- Mar. 2019 **MOS Team**  
UI | UX / Web-design / Graphic design

## About me

Hey, my name is Dmitry 🇺🇦, i live in Ukraine. I have over 5 years experience in Design! My main specialization is UI/UX design, but also in graphic design and good experience in brand development.

I consider social behaviors, trends, moods and data to help inform my creative concepts. Except personal projects, I made commercial projects for big company and also helped launch several startups. That's why I'm sure that I can help you to improve your business...

My approach:

**Analytics:** for getting the best result I have to delve into research which included analysis of business.

**Framework:** my clients will get the structural model of information that best suits user needs. -

**User Interface:**

as soon as the basic framework is ready, I can focus on the interface. At first, I create a prototype and after the adoption its time to design-layout.

**Development:** engineering development will begin after the development of interface. To keep it interesting, many scripts of HTML will be applied. You'll get the prototype (html, css, js), which can be integrated with the system then.

I would love to hear from you and let's make something beautiful together!

## Skills

### Professional

- Adobe Photoshop 5
- Adobe Illustrator 4
- Figma 4

### Personal

- Drawing 4
- Creative 4
