Professional Summary

An aspiring Associate Product Manager having skill sets in Product Management & Development, and Consulting with 3+ years of experience in the B2B SaaS industry. Granted 3 Australian Patents and published Research papers in IEEE Access and Springer, interested in solving user problems.

Work Experience

Career Accelerator Program - Product Management Fellow, Upraised, India

July 2022 - Present

- PRD 1: [Enabling users to buy from local stores through the WhatsApp Messenger](#)
- PRD 2: [Enhancing the Subscription Purchase Experience for Bumble Users](#)
- Product Teardown: [Product Teardown of Fitbit app](#)

Senior Product Executive, Wipro Limited, Bengaluru, India

July 2022 - October 2022

- **Customer Management:** Contributed to the development of a high-priority regulatory 5G Li-fi Prototype by collaborating with cross functional teams to perform vital market trends' analyses & business strategies, improving maximum services supported per customer by **30%**.

Business Consultant, Wipro Limited, Bengaluru, India

December 2020 - July 2022

- **Customer & Stakeholder Management:**
 - * Piloted the 5G Edge computing initiative with Intel by cognizantly furnishing the needs & wants, and required user research, due to which Intel OpenNESS officially declared Wipro as a partner company.
 - * Prototyped marketing collaterals and mockups for **10+** solutions used at **100+** customer demos. Comprehensively quantified in-depth actionable infographics, & expressive storytelling angles for prospective customers.
 - * Handled various CxO level 5G tech-business demonstrations across multiple industries. Resulted in greater acceptance of investments and Wipro's Partners by **2x**.
 - * Aided in systematically writing White papers across 5G tech-business prototypes, which significantly helped Senior Management and stakeholders evaluate projects' success at multidisciplinary levels.
- **Project Achievements:**
 - * Remodified the 5G deployment's prototype designs on Nokia's edge platform marketplace by securely prioritising the strategy & organization of chief UX/UI engineering/data trade-off features, achieving a **25%** reduction in the potential testing time process.
 - * Spearheaded the refinement of a 5G central management infrastructure by assessing the metrics across analytics APIs and streamlining the management of Azure support services, which reduced CPU processing cycles by a minimum of **40%**.

Project Engineer, Wipro Limited, Bengaluru, India

July 2019 - December 2020

- **Customer & Stakeholder Management:**
 - * Prepared and deployed a 5G Cognitive Network Automation prototype by analysing real-time network congestion ML models. Achieved an increase in customer satisfaction index for analytics services by **15%**.
 - * Engineered a real-time Dynamic Augmentation control feature for 5G Remote Classroom Prototype, rationalising major computational requirements on customers' web UXs by **43%**.
 - * Formulated and maintained 5G prototypes' technical documents, effectively contributing towards a clear roadmap for future projects' sprints between stakeholders & assigned teams.
- **Project Achievements:**
 - * Contributed to realise a 5G video conferencing prototype for the Toronto Airport Command Center by leveraging Open Source technologies (like Jitsi) and Network Hairpinning Architecture. Yielded in achieving the launch state in a record time of **4** months.
 - * Re-established a 5G Enhanced Contextual Ads prototype by implementing computation algorithms to incorporate Mobile Edge Computing node's analytics & offloading techniques, which led to more than **80%** run-time improvement in debugging measure.

Education

Career Accelerator Program - Product Management, Upraised, India

July 2022 - Present

- UX/UI Design · User Research · Problem Solving · Product Requirements & Tech Specs Documentation.

B.Tech C.S.E., VIT, Chennai, India

July 2015 - April 2019

- Secured 10/10 GPA and was one of the CSE Branch Topper among approx. 350 students in the 8th Sem, with an overall 8.79 CGPA out of 10.
- Held Senior Committee Member positions for the Rotaract, ACM, Android, Dance, and Enactus Clubs.

Patents & Research Papers

- Networked & coordinated with international faculties to methodically grant Australian patents and publish formalised research papers on various streams, demonstrating different angles of innovative solutions and providing unique insights into investment priorities, planning and research areas, partnership opportunities, time to market & disruptive technologies within a brief span of **1** year.
