Goldman Sachs (5 Years)

Associate, Finance and Risk Data Engineering

Jan 2017 – Jun 2018 | Bangalore

- **Product Design & Leadership:** Spearheaded the effort to redesign data pipeline and workflow for risk calculation & reporting
 - **Collaborate with business, dev and support across finance and risk** teams to identify user, data, regulatory & system requirements and current deficiencies
 - Got **buy-in from all BU heads** in Market Risk for a multi-year proposal to upgrade core systems; **developed product roadmap and rollout plans**
 - Kick-started first phase of implementation **managing a team of 5 developers**
- **Process Optimization:** Led the team to redesign a daily, critical data enriching system that **lowered processing time from 2 days to 2 hours**, aiding in early sign-off and reporting of risk number
- **Chosen by Senior Leadership** to be part of a **partner sponsored working group** to standardise data models and ensure data integrity across risk and finance; **youngest member and only associate in the group**
- Published **Software Development Life Cycle (SDLC)** and Go-Live guidelines for project development within Data Risk Team

Analyst, Market Risk Technology

Jun 2013 – Dec 2016 | Bangalore

- **Saved the firm over \$200M** in capital charges by driving a complex multi-team project spanning 18 months
 - **Team Management:** Starting as a junior member, stepped in to lead and deliver the project in a time sensitive situation
 - **Project Management:** Key responsibilities included project management, design and development, sign off and support
 - **Stakeholder Management:** Coordinated with global stakeholders across functions for development and rollout
- **Handpicked to be part of a cross-divisional effort** to streamline end of day processing of trades; headed roll-out for equity business, working closely with equity strategies and tech teams
- **Root Cause Analysis & Resolution:** Proposed and led an effort to resolve root cause of data discrepancies highlighted by a critical daily reconciliation process, **reducing support man hours by 20%**
- Conceptualised and developed a **tool for risk users to correct erroneous risk numbers**, enabling accuracy in reporting

Adobe (6 months)

Technology Intern

Jan 2013 – Jun 2013 | Noida

- **UX Design:** Built UI components that were integrated in the Adobe Social
- **Software Development:** Contributed to the design and development of webinars focusing on social streaming pod in Adobe Connect
