PROFESSIONAL EXPERIENCE

Ingenuity Gaming Pvt. Ltd. 📅 07/2018 - Ongoing

Associate Tech Lead

- Leading the engineering team of 8, responsible for optimizing, debugging and developing PokerStars' Web App games (daily revenue of around \$2 million)
- Co-ordinating between cross functional teams including Product Managers, Clients, Designers and Testers
- Pro-actively maintaining template of Pokerstars games' client end for new requirements and stability that affects hundreds of thousands of users
- Managing, reviewing, supporting and training other members of the team
- Creating roadmaps and identifying risks for each game which could affect user experience, development timeline or compliance.

Senior Developer

- Created the first Pixi.js Pokerstars game using In-house Engine 'Quest'
- Developed 'Detachable Jackpots' to eliminate the need to develop 2 versions of the same game, with and without Jackpots Feature, thereby decreasing considerable development time for all future games
- Developed "Stylized Text" feature which allows use of Graphical Texts in place of strings in any specified languages
- Analyzed and Debugged In-House Engine 'Quest' bugs and found alternatives to accurately resize web apps to any and all types of devices
- Created and incorporated the 1st skill based game (shooting) into a slot game for Meridianbet

Developer

- Created workflows to streamline tasks and minimize feature errors and increasing overall efficiency
- Kick off & Game Development Document creation to increase understanding among cross functional teams
- Worked with an agile and multi-disciplinary team of artists, designers, testers and programmers to design, prototype, implement new gameplay assets and features

Associate Developer

- Took initiatives to learn and implement new libraries in development of games using Frontend Technologies
- Complete and partial development of Pokerstars games using Quest and Phaser
