Improvise, Adapt, Overcome. Mindset is EVERYTHING.

---

## Experience

UWC Holdings Sdn Bhd

2 years 1 month

NPI Engineer

January 2020 - Present (1 year 7 months)

Penang, Malaysia

Responsible to First Article which design a sustainable yet cost effective work flow regarding manufacturing, standard part and assembly related.

Keep track and make sure project met customer expectation on quality and deadlines. Compile post mortem to ensure FA delivered and transfer to MP without rejection.

Report to superiors and assistant manager and update to customer about project status and overall technical discussion.

Honored to to become Project Lead for individual customer(lead and supported by 2 junior NPI engineer) and Sheet Metal division for Team.

Junior NPI Engineer

July 2019 - January 2020 (7 months)

Batu Kawan, Penang

As a junior NPI engineer, I have been follow up 3 previous projects and was honored 1 new project as a project lead. Carefully handle internal/external issue arise and solve it immediately whether technical or non-technically.

Communicate through different department and coordinate as per project's Gantt chart. Bring the cost-effective manufacturing method on FA and implement after post-mortem.

Resermy

Business Development Executive

January 2018 - April 2019 (1 year 4 months)

Penang, Malaysia

- Work as Business Dev (in a startup as one of the founder)
- Increase customer base by either online/offline method via cold calling and social media marketing
- Promoting and company branding by story telling through daily social media posting
- FB/Instagram targeted advertising

Jabil

Process Engineer Intern

May 2018 - October 2018 (6 months)

Penang, Malaysia

I'm been part with tooling/equipment to ensure there is no risk that the tooling is arrived before scheduled production run. Digitalize tooling equipment inventory with Excel(zero cost).

Jabil

Test Engineer Intern

May 2017 - August 2017 (4 months)

Malaysia

- Run testing on the server board
- Solving the technical issue when the tester machine is down
- Set up the program and environment for the server board testing
- Update reports daily about the "in progress" board for shipping
