Routing and Switching (CCNA)  
Certified Engineer in Computer  
Vision  
DeepLearning.AI TensorFlow  
Developer

# Muhamad Syukri Md Ghazali

IT Engineer at ExxonMobil  
Johore

## Summary

As an Electrical and Electronic Engineering graduate, the technical projects that I have been assigned with in my university life have improved my critical thinking and decision making skills. Learning C programming through the engineering course has greatly influenced me to delve more into different programming languages to solve more problems in different ways. By taking extra online courses through platforms such as Udemy, FreeCodeCamp, and Zenva during my free time, I have learned to manage my time wisely as programming is a long and continuous learning process. Apart from that, in order to keep study-life balanced, I believe that mindfulness and productivity can be improved through sports. Once or few times a week I would spend my time for about 1 to 3 hours to jog or play squash. Reach out to syukrighazali95@gmail.com to connect with me!

## Experience

ExxonMobil  
Information Technology Engineer ( Network Analyst )  
September 2019 - Present (1 year 11 months)  
Kuala Lumpur, Malaysia

## Education

Zero To Mastery Academy  
Tensorflow Developer Course · (2021 - 2022)

The University of Manchester  
Master of Engineering (MEng), Electrical and Electronics  
Engineering · (2015 - 2019)
