Summary

Final Year Project (Degree) – Auto-Classification of Defect Green Coffee Bean Using Machine Vision

The objective of the individual project is to perform the auto-classification of the defect green coffee beans through machine learning. The algorithms for this project is using Convolution Neural Network (CNN).It is written in python and computes using cloud computing platform which is Google Colab. The accuracy is 78 % from 528 pieces of the testing image.

Internship program – SAM Engineering & Equipment (M) Berhad
Internship as an assistant of Quality Assurance Engineering and assistant of

Mechanical Manufacturing Engineering

Create a document system by using Excel Macro to make the workflow effective in preparing documentation

Experience

Skymind

AI Content Developer

October 2020 - Present (10 months)

Malaysia

Dell EMC

Data Intelligence Engineer

August 2019 - July 2020 (1 year)

Penang, Malaysia

SAM MEERKAT

Internship

October 2017 - December 2017 (3 months)

Penang, Malaysia

-Internship as an assistant of Quality Assurance Engineering and assistant of Mechanical Manufacturing Engineering

-Create a document system by using Excel Macro to make the workflow effective in preparing documentation

Education

Universiti Tunku Abdul Rahman (UTAR)

Bachelor of Engineering - BE, Mechatronics, Robotics, and Automation Engineering · (2014 - 2019)
