Environmental Management Policy To Be Implemented Across All Projects

At Beavis & Bartels Pty Ltd our Environmental Policy is based on a belief;

Our workers & our environment are our most important asset's and is our greatest responsibility. The public shall be given equal priority to that of our employees and the environment.

With key focus on the 5 key environmental objectives;

1. Air

We will implement required controls to minimise our atmospheric emissions these controls include;

- Wet cutting of concrete to minimise dust entering the atmosphere
- Use of dust extracting power tools to catch hazardous concrete dust

2. Water

We will implement required controls to protect our water supply system inclusive of our stormwater and local river systems these controls include;

- Sediment controls to protect drains and our river systems
- Backflow prevention devices to protect our potable water supply from potential cross contamination and back syphonage
- Using green star and water saving devices where possible to limit water consumption and general usage on hydraulic systems we install

3. Land

We will implement required controls to protect our land from general pollution and contamination these controls include;

- Storage of hazardous materials in bunded and lockable cages and in accordance with SDS documents
- Spill kits are located on projects to provide effective emergency response to any spills that may contaminate the land and surrounding environment

4. Noise

We will implement required controls to protect our staff, key interested parties and general members of the public from the output of noise associated with our works these controls include;

BEAVIS & BARTELS PTY LTD

LICENSED WATER, SEWERAGE & GAS INSTALLATIONS - MAINTENANCE

- Suppling our staff with both ear plugs and ear muffs and training them in use of and when to adopt these PPE controls
- Providing signage in our work areas to inform our employees, key interested parties and bystanders of noisy works and their duration
- Consultation with employees, key interested parties and bystanders of noisy works and their duration prior to starting the works so they in turn can implement required control measures

5. Waste

B&B management employees in the field practices specifically relating to the daily generation and disposal of waste materials and how to lessen the impact on the environment by implementing the required control measures which include

- Beavis & Bartels objective is to eliminate the creation of waste in the first place and to reduce task generated waste going to land fill.
- Beavis & Bartels, along with its suppliers, will strive to reduce the amount of waste being bought onto site by using alternative packing methods and where possible using alternative materials.
- Waste that is generated by Beavis & Bartels will be taken to the allocated waste management station on site and each piece of rubbish will be will be placed in the appropriately marked bins for disposal supplied by the principal contractor.
- At B&B head office we have a designated paper recycling bin to ensure the paper we generate which isn't required for record keeping purposes is recycled
- Any scrap metal materials such as left over stainless steel, copper or brass pipework is brought back to head office and recycled at local scarp metal facilities

Beavis & Bartels Pty Ltd as a company prides itself in being "Environmental Wise"
