- FREE shipping and installation
- All wash chemicals
- 3 par color-coded products configured for your facility
- On-site training

*The PERFECT laundry solution for
hotels, resorts, spas, hospitals, schools,
nursing homes, gyms and more....*

The Advantage

PC-PLUS All-Inclusive program conserves capital while ensuring you always have functioning laundry equipment, color-coded high performance infection prevention textiles combined with lifetime warranted hardware. The **PC-PLUS** program is tax advantaged because you write it off as an expense without laundry equipment on the balance sheet. No capital is tied up in any of this equipment.

PC-PLUS is the only program which combines the financial flexibility of outsourcing with the superior quality and control of on-site processing. With **PC-PLUS**, laundering becomes a utility service – just like water, gas, and electricity.

Cleaning up the Environment One Room at a Time

Infection Prevention challenges continue to plague hospitals, hotels, schools – everywhere. A key component of any infection prevention program is a high performance system of wipers and flat mops and other specialized products color-coded by area. These products, and the people who use them represent, the *first line of defense* against cross contamination.

Note: **PC-PLUS** can be configured to process any and all textiles including Spa towels, shower and cubicle curtains, sheets, pillow cases and any other laundered product

Incorporating “**best-in-class**”

products. **PC-PLUS** is a comprehensive program incorporating a system of high performance color-coded products supporting ONEperROOM™ processing, commercial laundry equipment configured specifically for your facility and needs, incorporating technology that ensures efficient use of water and chemicals.

Cleaning up the Environment One Room at a Time

PC-PLUS innovations

The ONLY equipment with Automatic Water Savings: Save a fortune on water with AWS—as much as 40% on small wash loads! AWS automatically calculates the actual weight of the load and adds precisely the right amount of water, significantly reducing water consumption and energy costs.

The ONLY equipment with Smart Dosing: Working with Automatic Water Savings (AWS), Smart Dosing automatically adjusts the ratio of laundry chemicals to water resulting in lower costs and a superior wash.

The ONLY true Color Coding: The PerfectCLEAN-PLUS system includes the only extensive true Color-Coded product line that supports an Infection Prevention Program eliminating cross-contamination in Patient Rooms, OR's, Isolation Rooms, Guest rooms and classrooms.

Eco-power: Saves you up to 15% on energy costs, and with our reversing dryer cylinders, your savings are optimized! Eco-Power dryer technology actually determines when garments are dry and then automatically lowers the dryer temperature reducing gas consumption.

ABC's of Housekeeping: Provides best practices, optimizes productivity and efficiency while reducing waste. Supports improved GS / GES / Medallia scores. Ensures a higher level of Guest Room Hygiene.

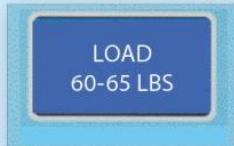

Hygiene Specialist Training®: Comprehensive training on best practices for the EVS department in support of increased HCAHPS AND Guest Satisfaction scores.

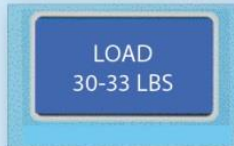

O.R. Processing: AORN recognized on-site training program including check-lists and best practices for processing the Operating Room.

PLUS reduces water and chemical consumption to match the weight of each load.

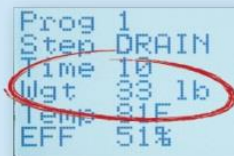

FULL LOAD

HALF LOAD

1. PLUS Washer Calculates Load Weight

2. Smart Dosing Adjusts for Load Weight

3. Less Water & Less Chemicals Consumed

Smart Dosing System – Smart Choice

Whenever **PC-PLUS** washers are loaded with less than a full load, the washers calculate the actual load weight and automatically lowers water consumption to match the load – savings are huge!

The exclusive **PC-PLUS** Smart Dosing System communicates with our washers so it knows actual load weights. It then reduces laundry chemical consumption to match each load. When you combine business expense tax deductions (or Medicare reimbursement for healthcare) with cost-savings from automatically reducing water, energy and chemical consumption - the superiority of **PC-PLUS** is clear.

**** 62% of all washer loads are less than a full load, so your cost savings are significant when Smart Dosing is utilized. Your laundry chemical company supplies the Smart Dosing hardware.***

PC-PLUS lets you TAKE CONTROL

- ☒ **No** capital investment for equipment
- ☒ **No** missed deliveries or short counts from linen rental or commercial laundry companies
