- 3 brads / paper fasteners

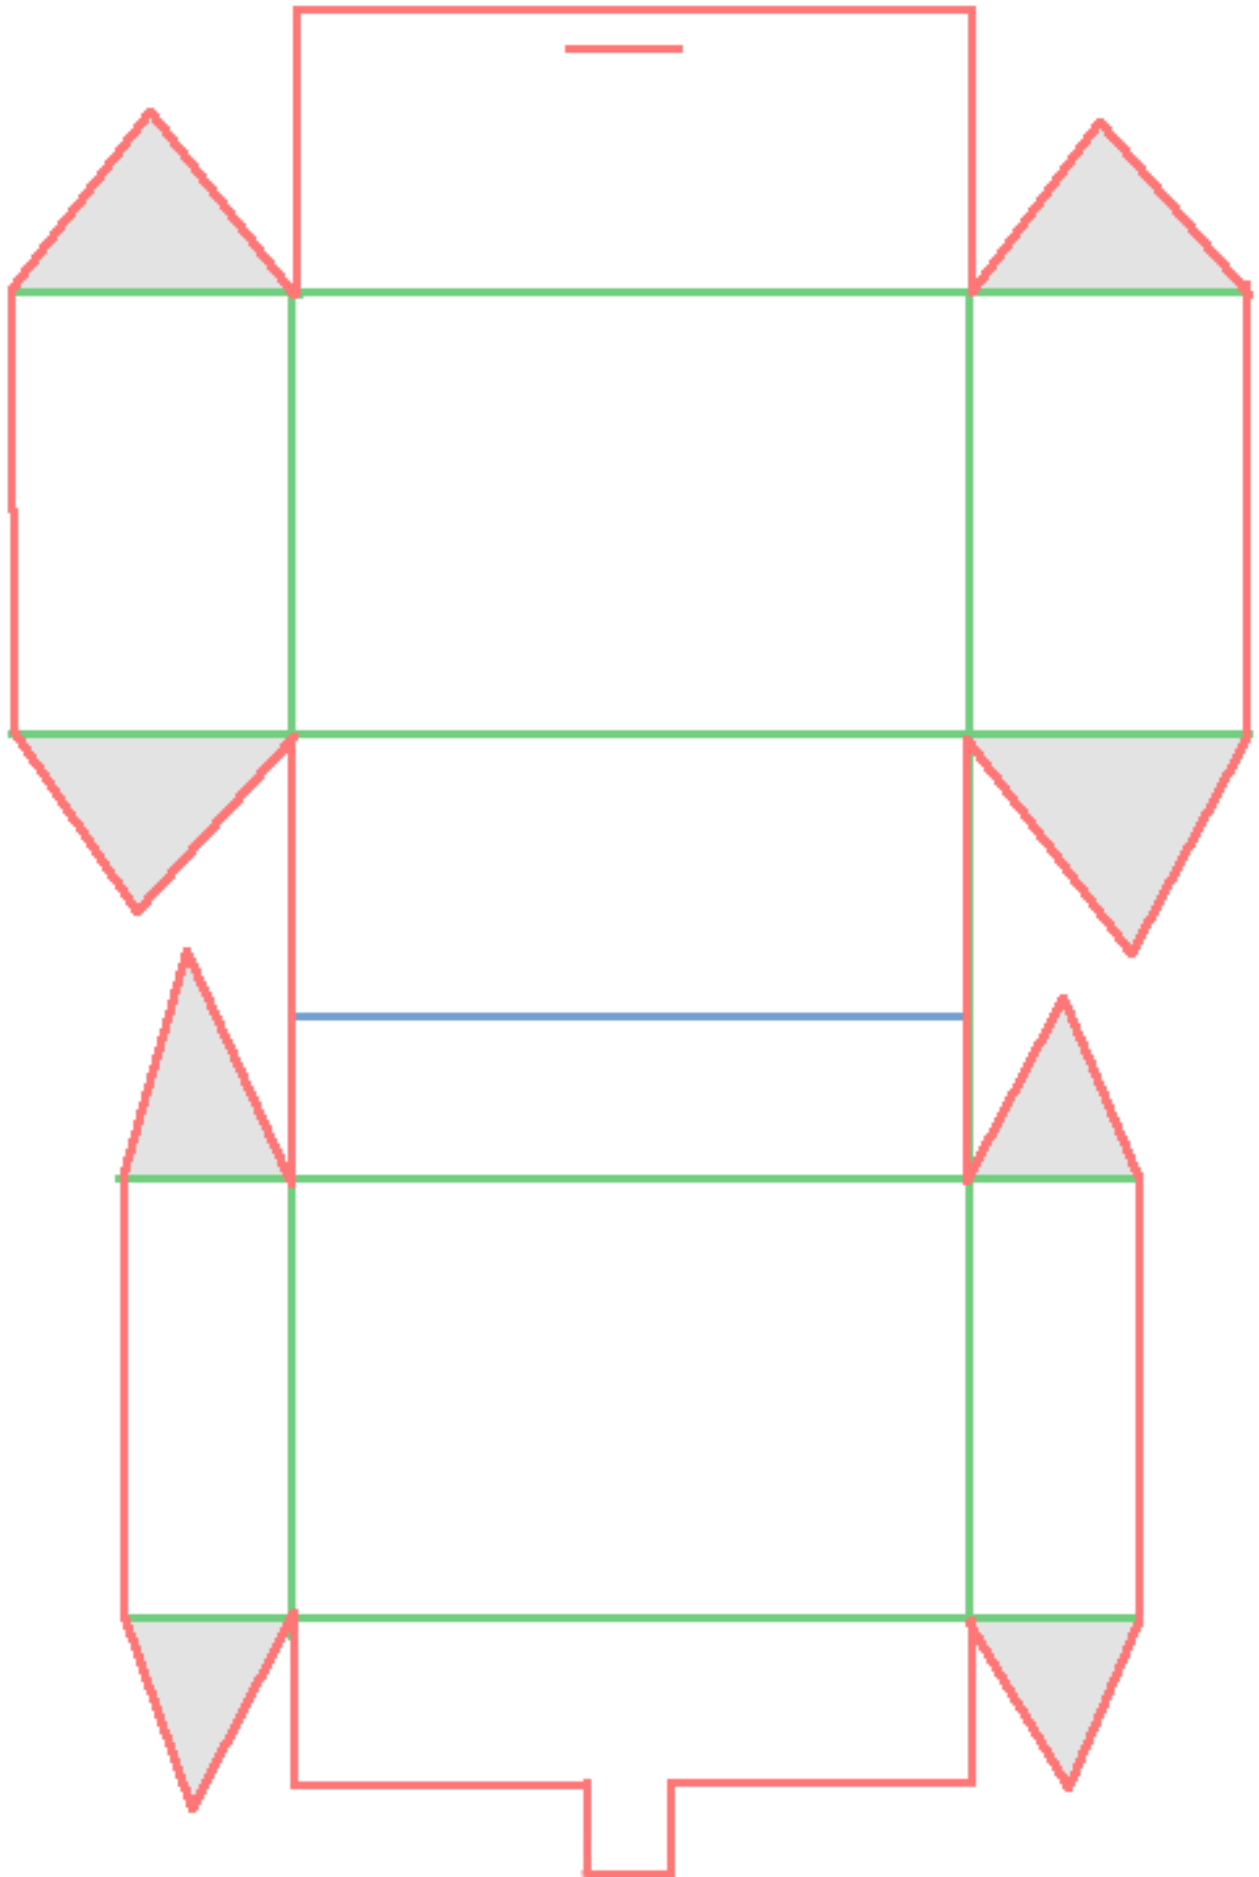

Preparation before Class

- Kids attending full-day will have 2 opportunities to go in depth with this project! Kids in only A or B will make the project but will probably do most of the decorating and detail after camp ends.
- This project relies on the use of a craft or xacto knife! Please supervise your child or be available to help. You can also view the [Cereal Box PDF](#) for instructions on how you can prepare the cuts ahead of time. Make sure you give your child a cutting mat if they are going to do the cuts with the class.

While making your design, use this example to help you think about how it will look when it is all put together!

Cut on RED lines. Fold on GREEN lines. Fold opposite direction on BLUE line. Glue on GRAY wedges.

Trace 4 holes on sides of box the same diameter as the paper towel rolls.

Make the red hole slightly larger so that rubber bands can also slide through on the roll.
