Your Partner in Polymer Solutions

Kaddas Enterprises, Inc. manufactures thermoformed plastic parts and has provided custom design and fabrication services for the Aviation Industry globally since 1966.

Why Thermoforming?

Thermoforming is the process of heating a sheet of plastic material until it is pliable and formed over a 3D mold. Thermoforming is a great alternative to injection molding when the part is too large, or the quantities are too low to warrant the high cost of injection-mold tooling.

OVER 50 YEARS INDUSTRY EXPERIENCE . CONTRACT MANUFACTURING

Our Capabilities

Our in-house design team is experienced in working closely with customers to create cost-effective, high-quality solutions.

- Custom design using 3D modeling software
- In-House Tooling and Mold Production
- Prototyping
- Accurate Replication of existing parts, using the latest in 5 axis CNC technology

Why Choose Kaddas?

- **Quality Products**
ISO 9001:2015 Certified
- **WBENC - Certified Women Owned Business**
- **98% success rate**
for on-time delivery
- **Perfect Safety Record Award for 5 consecutive years 2013-2018**
- **2015 International Business Award Recipient**
- **2017 Small Business of the year**

Industries We Serve

- **Public Transportation:**
railcar, coach, auto interior and exterior components
- **Commercial Airline:**
from Filters to Cabin Interiors
- **Power Utility Industry:**
Birdguard® products, preventing animal-caused power outages for the Global Energy sector.

OVER 50 YEARS IN TRANSPORTATION

KYDEX® Sheet Colour Collection for Mass Transit Interiors

KYDEX® 6200 Fire rated sheet for mass transit applications

KYDEX® 2200LT Thermoplastic sheet for rail motor housings

KYDEX® Sheet Colour Collection for Aviation Interiors

KYDEX® 6503 Integral pearlescent low-heat-release aviation sheet

KYDEX® Thermoplastics Textures

KYDEX® thermoplastics are offered in eight textures. Each texture presents its own unique opportunities and challenges. Textures are embossed into the sheet during the extrusion process, so available textures may be limited based on material grade, thickness, or width. Pressure forming with KYDEX® material offers limitless opportunities for part texture.

*Images of our sample range are for representation only. Colour selection should be based on physical sample through the designLab™.
