Local Languages

An eSign interface in a language the signer understands.

With Local Languages you can convert the entire eSign flow (*buttons, consents, instructions*) into a local Indian language with a SINGLE CLICK

Two ways to use Local Languages-
1. You set the language for the eSign journey
2. Signer can choose the language for the eSign journey (*just like ATMs*)

English

Why you should offer signing journeys in a local Indian language to your signers

Makes signing journey easier for signers

Makes regulatory audits easier with document and the signer consent collected in local Indian language

Helps enforcing agreements - the signer can't refute the document and eSign consent given in a language THEY understand

Helps meet your internal compliance requirements

Helps build trust with the signers - they are less suspicious of eSigns and more willing to perform the digital flow

Reduces your TAT - field/branch officers have to spend less time explaining each and every step to the customer

Give signing instructions to your signers in a ==language THEY understand== with Local Languages.
