 - Theoretical models.
 - Neurological brain difference.
 - A Spectrum Condition.
- **Diagnosis:**
 - Diagnostic pathway for children:
 - Including female presentation and masking.
 - Difficulties getting a diagnosis.
 - Diagnostic pathway for adults:
 - Including the generation gap.
 - Why a diagnosis is helpful.
 - Personal journey.
- **Linked Conditions.**
- **Discrimination.**
- **Legislation and guidance to support those with Autism.**
- **Challenges and how to overcome them.**
 - Behaviour and strategies.
 - Understanding the sensory world.
- **Strengths and attributes.**
 - Statistics.
 - Application to life.
- **Local organisations that can Support Autistic individuals and their families.**
- **Questions?**

Absolutely brilliant – All information useful and helpful!

I have learnt so much about Autism. I can't think of the most useful part as it was all very good – the best training I have been on!!

This can be delivered within your workplace for up to 30 people and includes handouts and a certificate for each participant. For pricing please contact us...
