Projects want to lock tokens and limit circulating supply, but early investors demand liquidity... so they fight for short vesting and large TGE % unlocks.
The solution: UNVEST
We make **tradable** vesting tokens **the norm**

By building **free vesting tools** for founders

(Our vesting contracts include built in code to support the secure transfer of LOCKED tokens, while protecting founders)
THIS MEANS
LONGER VESTING
+ LOWER UNLOCKS

THIS IS VERY VERY GOOD FOR PROJECTS
AND EARLY INVESTORS
♥♥♥
Investors can **take profits early**

New Buyers are able to access tokens **below market price**

**Presale price**
- $0.10

**Liquid market price**

COMPLETELY TRUSTLESS ON-CHAIN TRADING OF LOCKED TOKENS ON ETHEREUM, ALL EVM CHAINS/L2s + CARDANO
The contract mints Liquid Vesting Tokens representing the rights to the original tokens, divided by instalment (eg. 3mth, 6mth) these are sent to investors and can be freely traded on their own market pairs.

At TGE, a project owner sends their tokens to our audited contract, along with recipient addresses for their investors, and a few other vesting details.

On maturity, the buyer holding the Liquid Vesting Tokens can redeem them 1:1 for the original unlocked token via the Liquid Vesting contract.
How many vesting schedules?

Here's a preview of your new NFTs

Unvest will next week reveal one of these NFTs to each of your investors.

Details

This NFT represents a vesting token in UNVEST. The name of the NFT can be found on the Unvest website, where you can also find more information.

Unvest event: August 30, 2023, 8:00 PM GMT (UTC)

Please note: Due diligence is necessary when purchasing this NFT. Risk and value estimation is not guaranteed. All content has been approved by the relevant parties.
At launch, a project owner sends their tokens to our audited contract, along with recipient addresses for their investors, along with their desired linear (block-by-block) vesting parameters.

The contract securely stores the project tokens. Each investor is sent a unique NFT representing the rights to a particular allocation. Only the wallet holding the NFT can submit valid claim transactions against that allocation.

To sell your unvested allocation, simply sell your NFT. Once the buyer takes custody of the NFT, they can begin claiming tokens. NFTs can also be rented out on third-party marketplaces and split.
Then more to come...
