The Future of Smarter and Safer Indoor Air

Office Case Studies

# medicair

## Case Study - Advance

Purchased 22 units in January 2021

“The air-purifiers look smart, and provide an added comfort knowing the air we’re breathing is the best possible quality. They are simple to set up, and it’s great that they can be automated. It’s so easy to make changes to the settings via the App. I feel so much safer with the air-purifiers in our office, and I’ve found I’m not sneezing as much as I used to. The air-purifiers are quiet, they blend into the office, and I hardly notice them there! It is such a comfort knowing that I can come into the office and work safely with the air-purifiers giving an extra layer of added comfort.”

**Julie Critchley, Director, Advance**

## Case Study - LDP Luckmans

Purchased 8 units in September 2020

“We introduced MedicAir as a method to protect our staff and clients. The product is exceptional and is very easy to use. The team are helpful, efficient and knowledgeable. Highly recommend!”

**Ash Rishiraj, Director, LDP Luckmans**

## Case Study - M&M Information Technologies Limited

Purchased 2 units in October 2020

"I purchased a pair of MedicAir units to assist with making our office COVID-secure; our only form of heating is a recirculating air conditioning unit and our windows do not open. The advice I received from the MedicAir team was first class, and they assured me that the units would be suitable for what I needed. Setup was very straightforward, and the phone app makes remote management of the devices a complete snip."

**James Gilliver, Director, M&M Information Technology**
