

PLATFORM SCIENCE MESSAGES

Stay connected with Platform Science Messages, a driver-focused chat application that keeps your teams in sync while on the road.

SINGLE- AND MULTI-DRIVER CHATS - Keep lines of communication open with PS Messages. Chat with one driver at a time or your entire fleet—the choice is yours. You can also send messages directly from your TMS.

REAL-TIME MESSAGING - Connect with drivers without losing a beat. Real-time message threads keep your conversations up-to-date around the clock. Plus, you'll know who received messages with read receipts.

PRIORITY MESSAGING - Ensure drivers receive and read urgent messages. Priority chats can be read aloud on tablets or viewed by drivers once they're safely off the road.

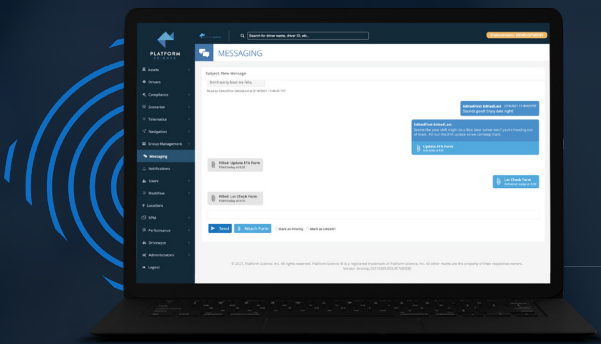

PS WORKFLOW INTEGRATION - Track chats and associated load information. Messages and Workflow are integrated, making it easy to communicate task updates.

Connect with us to see PS Messages in action and learn how your fleet can stay safe and compliant on the road ahead.

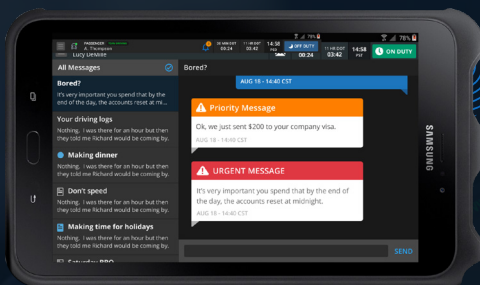

ONE-WAY MEMOS

Send notes or quick reminders to drivers. Messages' one-way memo feature enables you to send longer messages with read receipts.

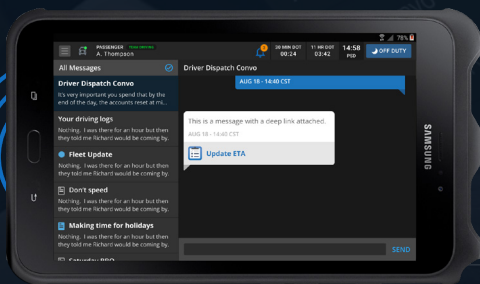

DEFINE MESSAGE HIERARCHIES

Create hierarchies of information with priority messaging features. You can choose to send messages as normal, priority or urgent depending on your need.

DEEP-LINKING

Easily connect your drivers to the apps that matter via intelligent deep linking to Platform Science and 3rd party applications within Messages.
