The bird flies from the branch

**00:00:43:07 - 00:01:05:19**

[NARRATOR]

Next up, one of our mixed enclosures. Here you can find a variety of species living harmoniously. Up top, the plush-crested jays take to the branches, while our crested tinamou lay below. These birds don't fly often, but don't be fooled. They're strong, and if they had to, they could burst into flight fast.
