[CARLO]

Hi, I'm Carlo, from Sil's Complete Auto Care Centre, and today we're going to be inspecting a cabin filter and finding out the benefits of why you should replace it.

TEXT ON SCREEN - How to Check and Replace Your Cabin Filter

(DESCRIBED VIDEO)

Blue bars swipe across the screen

**00:00:14:03 - 00:00:30:21**

[CARLO]

Okay, we're going to be inspecting the cabin filter on this vehicle, so on some cars, you're going to have to take a look at the owner's manual to find out the exact location of where the cabin filter is. On this particular vehicle, it's located behind the glove box. Let's take a look and see what this filter looks like.

(DESCRIBED VIDEO)

Carlo leans into the passenger side of the vehicle as he talks to the camera

TEXT ON SCREEN - Check your owner's manual for your vehicle's cabin filter location.

**00:00:30:21 - 00:00:42:13**

[CARLO]

So, when we go through and do the cabin filter, from a safety standpoint, we want to make sure that we've emptied out the glove box. So, any materials that are in there, just take them and put them out of the way so that way they're not going to drop out.

(DESCRIBED VIDEO)

Carlo opens the glove box and prepares it for removal by taking out the items inside

**00:00:42:13 - 00:01:07:11**

[CARLO]

Next, we want to go through and follow the proper manual instructions to go through and remove the glove box. So, on this model, we're going to be going through, releasing some tabs on the sides. And then lowering the box down. There's two clips that hold the box on the bottom, so we're going to want to remove those. And gently put the glove box out of the way.

(DESCRIBED VIDEO)

Carlo removes the box from the dashboard

**00:01:07:11 - 00:01:22:12**

[CARLO]

Now we have an opening where we can see inside, and what's going on. The cabin filter on most vehicles will be a little square box that will have an indication showing that there's a filter inside. So, I'm just going to take a look up inside, and go find out where our container is.

(DESCRIBED VIDEO)

Carlo points to the opening where the glove box once was

(DESCRIBED VIDEO)

A picture of a clean filter appears over the dashboard

**00:01:22:12 - 00:01:28:04**

(MUSIC)

(DESCRIBED VIDEO)

Carlo looks for the filter container within the dashboard area

**00:01:28:04 - 00:01:37:23**

[CARLO]

Once we have the lid off of the cabin filter, we'll just put that out of the way, and you'll have access to the cabin filter, and you can look and see the condition of it.

(DESCRIBED VIDEO)

Carlo pulls the lid for the filter container from inside the dashboard

(DESCRIBED VIDEO)

Carlo reaches in and grabs the filter

**00:01:37:23 - 00:01:49:18**

[CARLO]

So, I'm going to show you this one here. So, this is one that's in this particular vehicle, and this is what the replacement should look like.

(DESCRIBED VIDEO)

Carlo brings the soiled filter out of the container; he holds it up for the camera

(DESCRIBED VIDEO)

Carlo holds a new filter up next to the used one, showing the difference in colour

**00:01:49:18 - 00:02:15:21**

[CARLO]

Now, it's important when removing a cabin filter, you're going to see on some models, you can see the arrows on the sides of the filter, and we want to make sure that we follow the same instructions on the replacement. So, this one means arrows go up. So, we want to make sure that that filter goes back in the same way. So, I'm just going to lean down.

(DESCRIBED VIDEO)

Carlo continues to hold the filters up, and points to the edge of a filter where an arrow points up to indicate how it should be placed in the container

(DESCRIBED VIDEO)

Carlo shows the arrow on the new filter

**00:02:15:21 - 00:02:27:16**

[CARLO]

Make sure the filter is put back in properly, nice and straight, and then go through, reassemble, and put things back together again. That's how you inspect, and also replace your cabin filter.

(DESCRIBED VIDEO)

Carlo places the new filter into the container

**00:02:27:16 - 00:02:28:16**

(MUSIC)
