00:00:07 - 00:00:12

[Music]

[Described video: Split screen - The Winter Wise logo and text appear over a white and blue background; the CAA Approved Auto Repair logo appears over a blue background]

[Text on screen: *Coolant and Your Engine Cooling System*]

[Transition: Blue bars swipe across the screen]

00:00:12 - 00:00:19

Ju >> In winter, when you turn on the heat in your vehicle it is actually your engine cooling system that keeps you warm.

[Described video: Close up of tires driving on a snowy road]

[Described video: Close up of a hand pressing the heat button in a car]

[Described video: Close up of a bottle of blue liquid being poured into an opening inside of a vehicle engine area]

00:00:19 - 00:00:26

Ju >> That's why it's so important to make sure your cooling system is functioning properly before you head into the winter months.

[Described video: A shot of the interior of the engine area of a car]

[Described video: A man drives a car]

[Described video: Aerial shot of an SUV driving along a snowy road]

[Transition: Blue bars swipe across the screen]

00:00:26 - 00:00:45

Ju >> Some common symptoms you may experience when your vehicle has a malfunctioning cooling system would be lack of heat in the vehicle, check engine light may be on, leaking coolant underneath your vehicle, or even a sweet, burnt smell when you come out of your car after a long drive.

[Described video: Ju speaks into the camera while standing in the auto shop]
