# LTE Business Connectivity

# Stay Connected!

## LTE Business Continuity

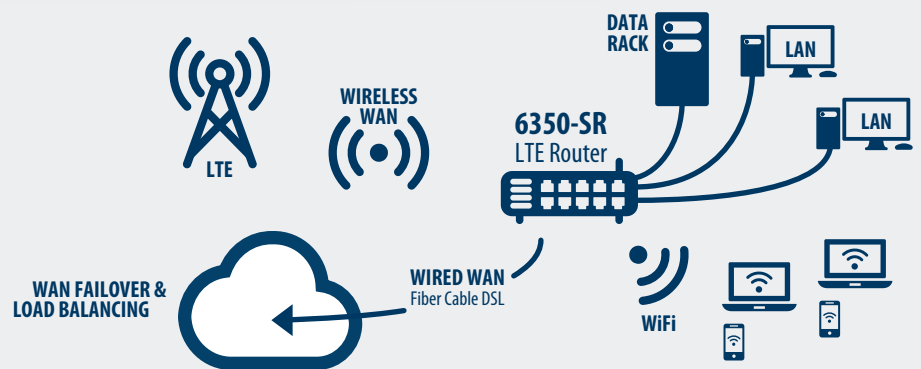

Let our 4G LTE Cellular Network eliminate downtime with our Business Class LTE Router as a backup to your primary broadband connection.

Our LTE Router is a compact, affordable and high-performance device that is compatible with most DUAL WAN port routers in order to provide better reliability from your existing equipment with minimal installation time and cost.

This LTE Continuity solution can also be paired with our SD-WAN option ("SecureBoost") to provide a completely managed disaster recovery solution. The LTE Router comes with a carrier certified embedded cellular modem for 4G LTE and 5G READINESS!

### IDEAL FOR:

Enterprise, Retail, Small & Medium Sized Business.

## LTE Business Continuity Plans:

Built-in software will filter content on the network to ensure that your critical applications stay up and running.

**5 GB** (Critical applications only)

**10 GB** (Critical applications only)

**50 + GB** (No content filtering)
