Whitepaper V1

\$SOUND

Powered by **BSC**

\$SOUND Coin has been designed to allow holders to reap the benefits from the real world use case of the currency.

As a \$SOUND holder you are investing into \$SOUND as a whole entity and owning a piece of all profits generated by our future products - which include a streaming service, NFT marketplace, and an NFT ticketing company.

Holders will benefit from reflections when :

An individual is paid via our streaming service for accumulating streams.

An NFT is bought or sold on our NFT marketplace.

A NFT ticket is bought for attending a \$SOUND sponsored event.

\$SOUND coin is bought or sold on an exchange.

Etc. This list will grow as \$SOUND begins to offer new products or services that help create more transaction occurrence with the Token, ultimately giving all investors a better frequency of redistribution rewards.

Technology and digital transformation have helped propel the world into a new era of technological advancement. An era where the materiality of money will cease to exist and the newer cryptocurrency asset class will hover on the horizons of finance. The current decade of the 21st century has seen much advancement, improvement, and progress in the blockchain and cryptocurrency space. This has led to the creation of several blockchain-based projects across various industries, with the goal of tackling some of the problems plaguing humanity. \$SOUND is a decentralized smart token project built on the BSC network. The project was created to solve real-world issues while also benefiting investors. The \$SOUND Coin reward system for holders goes far beyond financial gain and is the first of its kind, rewarding investors in unique ways unlike any cryptocurrency has done before.

TOKENOMICS

The Total Supply Is 1,000,000,000,000

2% distributed to holders

2% to marketing wallet

6% to locked liquidity

REWARD SYSTEM

We wanted to build something unique, something that would allow investors to truly feel that they are a part of something extraordinary.

When building out the infrastructure for \$SOUND our goal was to create a rewards program that not only allowed holders to benefit financially, but also through real life experiences.

Through our partnered collaborations with event promoters and famous musicians, \$SOUND holders will be allowed access to many things that simply aren't open to the general public, including but not limited to live and virtual concerts, events, meet and greets, limited edition merch drops, giveaways, NFT airdrops, and much more..

We will be announcing the dates for these events and concerts as they approach and will be updating our website accordingly.

TICKETING SYSTEM

Solving the ticketing problem :

Tickets for \$SOUND partnered live concerts and events will be airdropped to eligible holders in the form of an NFT to ensure a level of security and verification of ownership never before seen in the music industry.

Certain live events will offer additional perks for those holding 50,000,000+ tokens. These perks include things such as VIP passes, front of the live passes, early venue access, private tables, bottle service, priority seating, and invites to exclusive afterparties.

nft

We have a lot in store..

\$SOUND plans to expand our use of NFTs into ticketing, merch sales, giveaways, and much more.

Ticket distribution for \$SOUND partnered live events will be airdropped to holders via NFT to ensure security and validation of ownership.

While attending live events \$SOUND holders will be airdropped NFTs of limited edition merch that can be claimed at the venue by providing proof of ownership of the NFT upon pickup. That very limited merch, because it is delivered to you in the form of an NFT, can also be sold and traded.

We also have plans to expand our use of NFTs by collaborating with musicians to offer exclusive art as well as exclusive drops for new music to eligible holders.
