COURSE OUTLINE

The placement of a missing tooth with a dental implant can be considered to be a minimally invasive procedure.

This full-day, hands-on course will introduce participants to dental implants from an evidence-based perspective, and teach how to restore a single implant. The course covers all aspects of treatment planning, materials and the techniques needed to restore an implant and integrate implant dentistry into daily practice. The hands-on exercises will allow the participant to become familiar with the clinical components and tools required as they take impressions and learn how to insert the implant crown.

What you will learn:

- Indications of dental implant treatment
- How to treatment plan for successful implant restoration
- Familiarisation with tools and components
- How to take an impression of a dental implant
- How to communicate with your laboratory
- How to insert a dental implant crown
- How to maintain and look after your implants

ABOUT THE PRESENTER

Dr Graham Carmichael is a Board-registered prosthodontist and faculty member of the Brånemark Center in West Perth. He obtained a BSc from The University of Western Australia and has a Doctor of Clinical Dentistry in Prosthodontics from the University of Sydney.

Graham is a Fellow of the Royal Australasian College of Dental Surgeons and a consultant prosthodontist at Perth Children's Hospital and Royal Perth Hospital. He lectures nationally and internationally on all aspects of prosthodontics.

Dr Glen Liddelow completed a BSc and a MSc from The University of Western Australia and a Doctorate in Clinical Dentistry (Prosthodontics) from the University of Sydney. He is a Board-certified Prosthodontist, member of the Academy of Australian and New Zealand Prosthodontists, and Fellow of the Royal Australasian College of Dental Surgeons. Glen is also a member of the Australian Prosthodontic Society, the Australasian Osseointegration Society, the Academy of Osseointegration and the Dental Study Group of WA.

Glen has presented over 300 papers and lectures both nationally and internationally and is a member of numerous university and industry boards concerned with dental education. He is the Director of the Brånemark Center Osseointegration training program in dental implants.

An introduction to dental implants from an evidence-based perspective, including how to restore a single implant.
