**Thursday 11 August**

Registration from 6.15 PM  
**Course 6.30 PM to 9.30 PM**

**University Club**  
Hackett Drive Crawley

Three course dinner

**242** INC GST  
MEMBERS

### COURSE OUTLINE

Due to many reasons, many of our patients break their teeth, leaving us with very little tooth structure available for restoration afterwards. Crown lengthening of posterior teeth is a procedure that aims at exposing enough tooth structure by removing some of the gingival and bony support of the tooth, allowing us to restore the teeth successfully. But, what are the factors that you should consider prior to deciding that this tooth is a candidate for crown lengthening? Also, in the dental implant era, is there still room for crown lengthening procedures for posterior teeth? This presentation will answer these questions and discuss further considerations and limitations of crown lengthening procedure at posterior teeth.

### ABOUT THE PRESENTER

**Dr Samy Francis** works as a periodontist in private practice in Perth. Samy grew up in Egypt and in 2008, he completed a Bachelor of Dental Science with Distinction. Since graduating he has worked in both private practice and the public sector in Egypt, New Zealand, Central Queensland, Canberra, regional NewSouth Wales, and regional and metropolitan Western Australia. In 2018, Dr Francis completed a three-year postgraduate Doctor of Clinical Dentistry (Periodontics) degree through the University of Western Australia.

He worked in private practice in Perth, Bunbury, Darwin, and Adelaide until he decided to settle in Perth full-time. Samy is currently the treasurer of the Western Australian branch of the Australian Society of Periodontology (ASP WA). He is also a member of Faculty of Dental Surgeons, Royal College of Surgeons (Edinburgh), and the Royal Australasian College of Dental Surgeons in periodontics.

**Dr Armand Putra** completed his undergraduate degree in 2010 (University of Queensland) and graduate degree in 2016 (University of Washington). After his Prosthodontic training, Dr Putra completed a one-year implant Fellowship training at Loma Linda University.

He was awarded Certification by the American Board of Prosthodontics and National Board for Certification in Dental Laboratory Technology in 2017. He is currently an Affiliate Professor at the University of Washington (graduate prosthodontics), a member of American Academy of Fixed Prosthodontics, a fellow of the American College of Prosthodontics, and a Diplomate of the American Board of Prosthodontics.

In 2018, He has joined the team at Perth Prosthodontics as an associate, where he treats all aspects of prosthodontics with special interest in aesthetic and complex inter-disciplinary cases.

**This dinner presentation will discuss further considerations and limitations of crown lengthening procedure at posterior teeth.**
