COURSE OUTLINE

There are many options for the restoration of worn or un-aesthetic anterior teeth, however composite resin can often be an excellent, minimally invasive and economical solution.

This course is designed to give dental practitioners a greater understanding of treatment planning for direct composite resin veneers, as well as hands-on experience with the different techniques and materials available.

ABOUT THE PRESENTER

Dr Joshua Graieg is a Specialist Prosthodontist at the Brånemark Center in West Perth and Cottesloe Dental in Peppermint Grove. He completed a Bachelor in Dental Science from The University of Western Australia and a Doctor of Clinical Dentistry in Prosthodontics from the University of Sydney. He is also a Fellow of the Royal Australasian College of Dental Surgeons, a Consultant Prosthodontist with the Craniofacial Unit at Perth Children's Hospital, and a Key Opinion Leader for Kerr/KaVo. His main interests are biomimetic dentistry, aesthetic dentistry, minimally invasive prosthodontics, and both tooth and implant based prosthodontic rehabilitation.

Clin A Prof Glen Liddelow is a Specialist Prosthodontist at the Brånemark Center in West Perth and the Director of the Brånemark Center Osseointegration training program in dental implants. Glen is a lecturer and online expert advisor for the University of California, Los Angeles (UCLA) Global Institute for Dental Education (gIDE) program. He is a Consultant Prosthodontist at Perth Children's Hospital and Royal Perth Hospital. Glen has presented over 300 papers and lectures both nationally and internationally and is a member of numerous university and industry boards concerned with dental education.

This course is designed to give dental practitioners a greater understanding of treatment planning for direct composite resin veneers, as well as hands-on experience with the different techniques and materials available.
