LECTURE

COURSE OUTLINE

For clinicians with some experience with implant therapy, this program expands your skills to include more advanced aesthetic refinement for the single implant restoration, and introduction to short-span implant bridges. From the restorative perspective, this program covers loading concepts, treatment staging and the practical skills for implant provisional restorations that support soft tissue. Biomaterial options for abutments will be evaluated together with case presentations that illustrate the concepts covered in the program. Critical decision factors will be discussed, including: when to immediately load, ASC abutment and full contour zirconia implant restorations.

LEARNING OUTCOMES

- How to restore a short-span bridge
- How to treat advanced single-implant restorations
- Temporisation of implants to sculpt soft tissue
- How to customise an impression coping
- Restorative options with NobelProcera

ABOUT THE PRESENTER

Dr Graham Carmichael is a Board-registered prosthodontist and faculty member of the Brånemark Center in West Perth. He obtained a BSc from The University of Western Australia and has a Doctor of Clinical Dentistry in Prosthodontics from the University of Sydney. Graham is a Fellow of the Royal Australasian College of Dental Surgeons. He is a consultant prosthodontist at Perth Children's Hospital and Royal Perth Hospital. He has lectured nationally and internationally and is actively involved in the teaching and education of prosthodontics, and surgical and prosthetic implant therapy.

Dr Glen Liddelow completed a BSc and a MSc from The University of Western Australia and a Doctorate in Clinical Dentistry (Prosthodontics) from the University of Sydney. He is a Board-certified prosthodontist, member of the Academy of Australian and New Zealand Prosthodontists, and Fellow of the Royal Australasian College of Dental Surgeons. Glen is a lecturer and online expert advisor for the University of California, Los Angeles (UCLA) Global Institute for Dental Education (gIDE) program. He is a consultant prosthodontist at Perth Children's Hospital and Royal Perth Hospital. Glen has presented over 300 papers and lectures both nationally and internationally and is a member of numerous university and industry boards concerned with dental education. He is the Director of the Brånemark Center Osseointegration training program in dental implants.

Learn the practical skills for implant provisional restorations that support soft tissue.
