6.5
CPD

Saturday 17 September

Registration from 8.45AM
Course 9 AM to 5 PM

UWA Dental School
17 Monash Ave Nedlands

Lunch, morning and afternoon tea

935 INC GST
MEMBERS

COURSE OUTLINE

The Class I and Class II composites are the backbone of general dental practice. We do these restorations every clinical day, yet they can be tricky and troublesome. With so many different bonding systems, composites, techniques – how do we choose what will work best? It is the foundations of our dentistry and so important to be able to get it right. Every single time. In quick, efficient, reliable and predictable techniques to improve the success of your restorations. Take your posterior composites to the next level.

This course is designed for the recent graduate, or more experienced practitioner looking to improve their composite work.

COURSE TOPICS

- Diagnosis
- Rubber dam
- Bonding
- Matrix band selection & placement
- Composite placement techniques
- Finishing & polishing techniques
- Occlusal design

LEARNING OUTCOMES

- Learn to use predictable isolation techniques
- Understand bonding concepts using various generations of bonding systems
- Reliably select and place matrix bands
- Understand composite placement techniques
- Learn how to finish the restoration
- Review your restoration to minimise post-operative complications

ABOUT THE PRESENTER

Dr Michael Chan is a practising general dentist, focusing primarily on aesthetic and restorative dentistry. He is on the teaching faculty of Academy of Dental Excellence & Portsmouth University (UK) for the Post-Graduate Diploma of Advanced Aesthetic & Restorative Dentistry, a clinical consultant, lecturer and final-year research supervisor for Master's in Aesthetic Dentistry program in King's College, London and an academic and clinical lecturer for the Nordic Institute of Dental Education. He is also a dermal therapist and professional photographer.
