## A Secure Full Service Solution

The Next Payments CRT is a full-service unit: it manages jackpot payouts, provides ticket redemption for cash, redeems cards, breaks bank notes.

In addition, the unit monitors and certifies all transactions, maintains an audit trail, protects cash in a secure safe and is supported by the Next Payments 24/7 help desk, ensuring total reliability.

## ART™: More Than Remote Monitoring

\*CountR have not only delivered a hardware and software package that is superior to any other CRT on the market, but have also developed ART™; an intelligent monitoring system that tracks every transaction. The software allows for a proactive approach to general maintenance, such as cash level information for venue staff. It also identifies faults on the CRT for rapid return to service.

### Donate To A Charity

## Because Giving Back Is So Important

\*When a customer is cashing a ticket out, they will have the opportunity to donate small change to a charity of your venue's choice. For instance, if a payout is \$66.40, the CRT will ask the customer if they wish to donate \$1.40 to a charity and collect their winnings of \$65.

This enables customers to make small donations at an individual level. Your venue will be facilitating these good gestures and the ART™ software will manage reconciliation.

The ART™ software will report on the total amount donated by customers which can be included in your venues annual financial report and general communication.

## A Premium Solution

The Next Payments Cash Redemption Terminal (CRT) is a cut above the rest. The product has been designed and manufactured for Next Payments in Germany by CountR. Customers will enjoy the clear user interface, quick transactions and reliability.

The unit includes leading components, such as a JCM note acceptor and printer.

## Improve Customer Service

The Next Payments CRT is designed to improve customer's experience in your venue and eliminate waiting time at the cashier desk, allowing customers to spend more time on entertainment, and staff to focus on customer service across other departments within your venue.

### Marketing Opportunity

## Promote Your Venue

### Full Screen Advertisements

\*Take advantage of the beautiful 24" display monitor to display advertising and drive sales when the machine is idle.

You can push one message or have multiple advertisements rotating.

### Video Advertisements

The CRT runs video advertisements at the top of the screen when customers are using the terminal. This is a great opportunity to take advantage of customer's attention when they are engaged with the terminal.

## Platinum Service Guarantee

High uptime is important, and the ART™ system assists in providing this. Should there be a technical error, Next Payments will access the terminal, and typically resolve matters remotely. Where a technician is required, ART™ will self-diagnose and the display screen will indicate exactly where the fault is, ensuring a swift resolution. Finally, there is a 24/7 help desk. This ensures your venue's CRT is operating at the best uptime, resulting in an efficient gaming floor and satisfied customers.

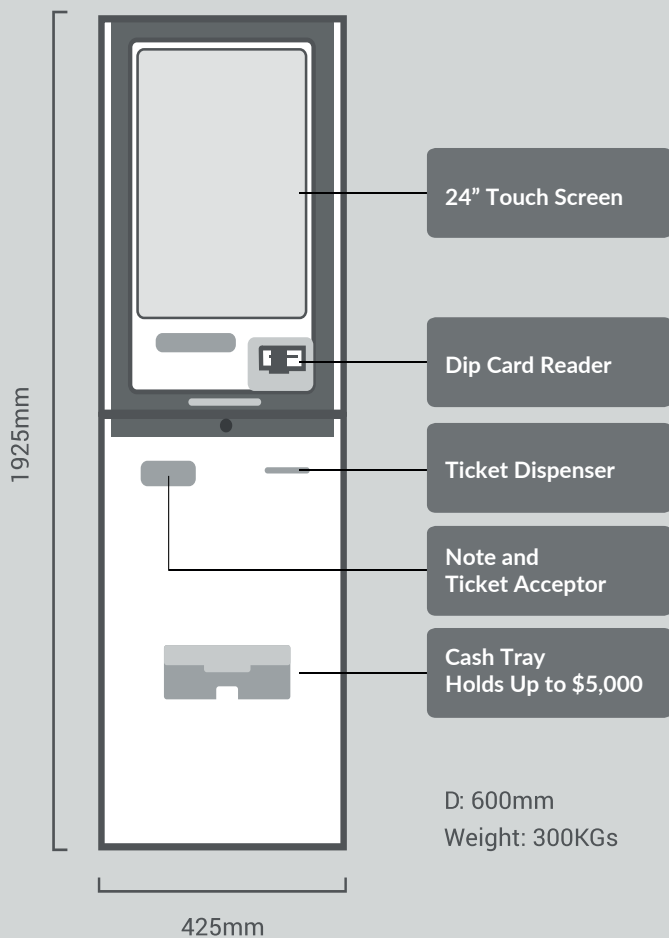

## World Leading Manufacturer

CountR supply to leading international gaming venues including Casinos Austria, Grand Casino Brussels, Holland Casino, Mystic Lake Casino (USA), Gold Reef City (South Africa), Sun International (South Africa), Casino Cosmopol (Sweden) and many other leading venues throughout the world.

CountR are proud to exclusively partner with Next Payments, who are Australia's fastest growing payments company, recently awarded **2016 Australian Financial Services Growth Company of The Year Award**.
