

# CLEANING COUPLING INSTRUCTIONS

1. Remove the push pull cap

2. Attach the coupling to the filter

3. Attach a bottle or squeeze pouch filled with CLEAN water to the other side of the coupling.

4. Squeeze the bottle or pouch vigorously to backwash the filter. Repeat as necessary until the filter is clean.

5. Unscrew the coupling and re-attach the push pull cap.

We recommend discarding the first quart of water before consuming in case you backwashed the filter with contaminated water.
