

Technical Data Sheet

Plurafac® LF RA-P

October 2018 |

Plurafac® LF RA-P is an excellent rinse aid surfactant for plastics. With a superior drying profile, it minimizes the effects of spotting and filming on plastics in industrial and institutional wash applications. With Plurafac® LF RA-P, less time will be spent manually and mechanically drying plastics, translating into cost savings for manual labor and energy. Plastics are widely used in the ware wash industry, a fact which makes faster drying after washing imperative. Additionally, Plurafac® LF RA-P is low foaming, a necessary characteristic of rinse aids. It can also act as a defoamer in the presence of food soils, which allows for more soil to be present in the wash solution compared to a commercial benchmark. Plurafac® LF RA-P is a sustainable solution for drying plastics in industrial and institutional applications.

Specifications	
Appearance @ 25 °C	Clear, homogenous liquid
Color, APHA	70 max.
Percent Water, Karl Fisher	4.7-5.7
pH, 1% aqueous at 25 °C	5.5-7.0
Viscosity (cPs)	185-205
Cloud Point (1% aqueous)	34.0-39.0 °C

Characteristics	
Odor	Characteristic
Form	Liquid
Density @ 23 °C	1.02 g/cm ³

Shelf Life:

BASF will endorse the results on the certificate of analysis for a period of up to two years from the date of manufacture for material in original, unopened, properly stored containers. Beyond two years, we recommend the quality of the material be confirmed prior to use, by retesting the certificate of analysis parameters. Please refer to the Safety Data Sheet (SDS) for this product for instructions on safe and proper handling and disposal.

Order Placement

To place orders for delivery in the United States or Canada, please call our toll free number (800) 443-6460.
For other Information including product literature and Material Safety Data Sheets please call (734) 324-6101.
Or Visit Our Website At: www.performance.basf-corp.com
