Storage and Handling:

Liquid that has solidified or exhibits signs of stratification should be heated until fully melted and thoroughly mixed before using. Temperatures above 45°C for extended periods can lead to yellowing of product.

Shelf Life:

BASF will endorse the results on the certificate of analysis for a period of up to two years from the date of manufacture for material in original, unopened, properly stored containers. Beyond three years, we recommend the quality of the material be confirmed prior to use, by retesting the certificate of analysis parameters.

Please refer to the Material Safety Data Sheet (SDS) for this product for instructions on safe and proper handling and disposal.
