PART SCULPTURE, ALL SOUND

We are driven by one simple challenge – to create products that are as ingenious as they are beautiful. Audio technology that not only fill spaces with excellent sound quality, but provide an immersive experience for all of our senses.

01.

Pantheone Audio

Our team at Pantheone Audio share an uncompromising commitment to hand-crafted quality, purposeful design and meticulous engineering. The Pantheone philosophy is that everything you own should be exquisite which is why we pour passion and intent into every detail of our brand.

Based in Sydney, Australia, we work with a global team of passionate creators, designers and engineers. Our products blend form and function at their purest to achieve speakers that look like sculptural art while meeting the highest audio engineering standards.

Our brand is built upon three core themes – ART ▪ FORM ▪ SOUND. We take inspiration from the world of design, architecture, dance and music – both classic and contemporary. Creativity is contagious, and we aim to pass it on through everything we do.

01.1

Pantheone Pillars

ART.

Music in itself is one of the purest forms of art. Pantheone Audio sets itself apart as a brand that celebrates the unequivocal talent and passion that exists worldwide through the stories of artists near and far.

FORM.

The Pantheone Audio products take on a sleek and sculptural form – allowing them to live harmoniously amongst any of their interior surroundings. Inspired by the organic forms found in nature, whilst focusing on the engineered curves and edges found in architecture, the very concept of our products strive to challenge the traditional idea of today's technology.

SOUND.

The relationship between sound and space is at the very core of our brand. We design products that breathe symphony into any of their surroundings with beautiful acoustic clarity. State-of-the-art engineering not only informs our products, but fuels our passion for expression through creativity.

A MASTER PIECE IN EVERY SPACE.

02.

Pantheone I

The Pantheone I is a bespoke and functional piece of art, combining flawless function with minimalist design and bringing you sound that can be seen, felt and heard.

Having spent four years perfecting the Pantheone I, our vision was to create a speaker built with equal focus both on the interior and exterior, fusing the smoothest of sounds with a sleek and minimalist aesthetic. The result is a highly polished and high-density resin speaker that opens the door to nuance through its unique form and acoustic qualities.

Inspired by the oculus of the Pantheon in Rome, the sculptural form of the speaker allows for depth of sound, bringing the musician into your home with exquisite reproduction. The innovative curved shape also provides excellent rigidity and robustness, enhancing the speaker's acoustic wave technology and offering the user a 360° immersive experience.

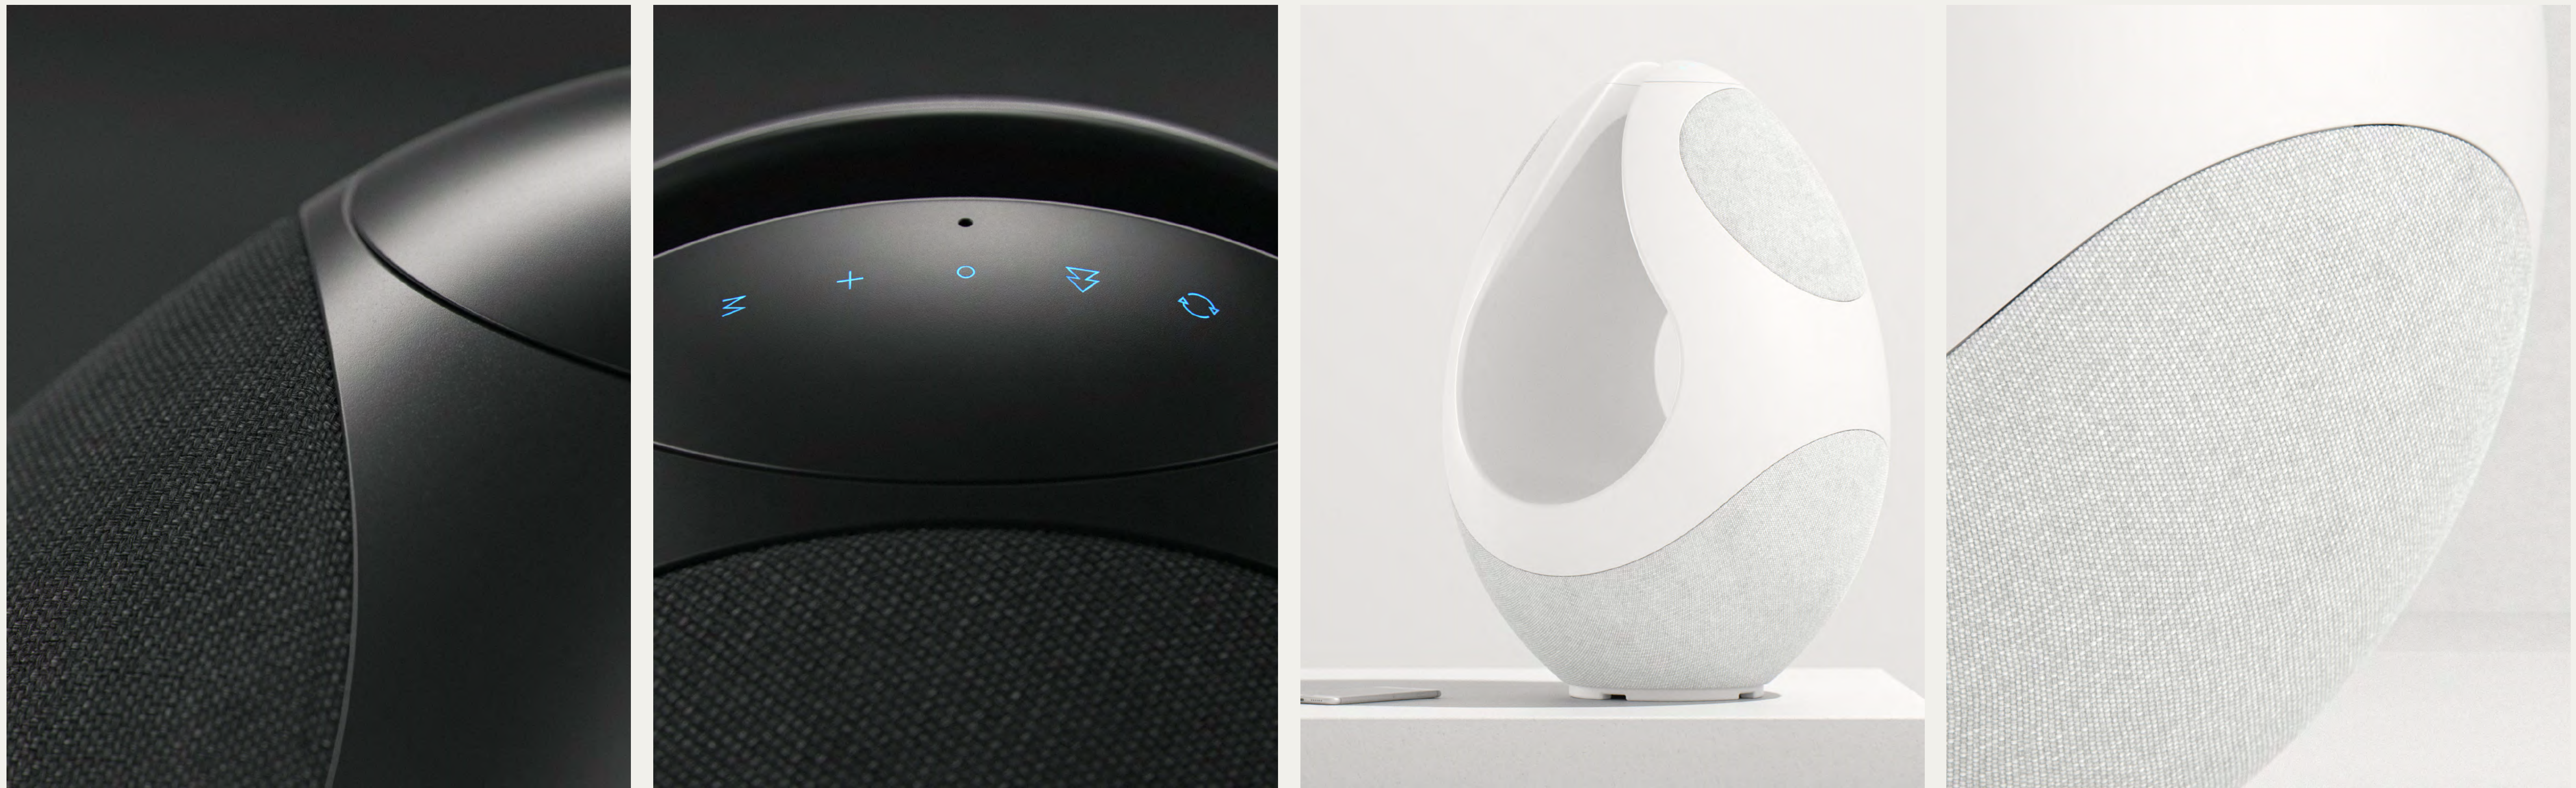

The handmade polished resin casing of the Pantheone I means that no two speakers are exactly alike. Each one is an entirely unique piece of art in itself.

Music is one of the most prominent forms of art. It evokes emotion and inspiration within each and every one of us. The Pantheone I allows us to enjoy the expression of sound with more than just our ears.

02.1
Products

BLACK / WHITE

The Pantheone I, our flagship speaker, was designed in smooth black resin with matt black acoustic cloth as well as in pure white resin with ash white acoustic cloth.

We celebrate connection between
the natural and the engineered and form
is the thread that binds them.

03.

Pantheone I Functions

The Pantheone I is intuitive to use and caters to a wide audience through multiple control points. All functionality can be accessed via touch buttons which are inconspicuously housed in a control panel on the top of the speaker. It is also the largest and most powerful Alexa-compatible speaker on the market, allowing for a world of exploration at the mention of just one word.

The Pantheone App can be linked up to eight Pantheone speakers, creating a multi room sound system that can be controlled via one simple application.

Each Pantheone I features two powerful built-in woofers connected by a long-throw voice coil with very high excursion capability. Two subwoofers are housed in a bass reflex chamber with curved port tubes and placed in a diametrically opposed configuration in order to cancel mechanical vibrations and enhance the listening experience. The cabinet's symmetrical design offers stereo sound filling the room at 360 degrees, with two tweeters and a hifi-range driver on each side.

04.

Pantheone InSitu

Music inspires artistic expression, and Pantheone Audio products inject creativity into any environment – whether it be a gallery, art studio, design collective or personal living space for those who appreciate a minimalist aesthetic that is both flawless and functional.

The visually-striking sculptural designs of Pantheone Audio products allow them to enhance and uplift the appearance of a space. They are autonomous works of modern art that captivate attention and are able to adjust to the style of any interior.

Simple, yet powerful.
Innovative, yet alluring. This is what
a sound system should look and
feel like.

Awards & Press

The Pantheone I is art for your eyes, ears and soul. Our unbridled dedication to excellence in its design earned us both a Red Dot as well as an Archiproduct Design Award. In addition, our website was recognised as Site of the Day by Awwwards for its brand experience, innovative product designs and insights that inform our core themes.

We have gained some attention in the press with reviews by The Sydney Morning Herald, Vogue Living, Elle Decoration and many more. Have a look at our Press Page on our website to read more reviews by press publications.

Awards

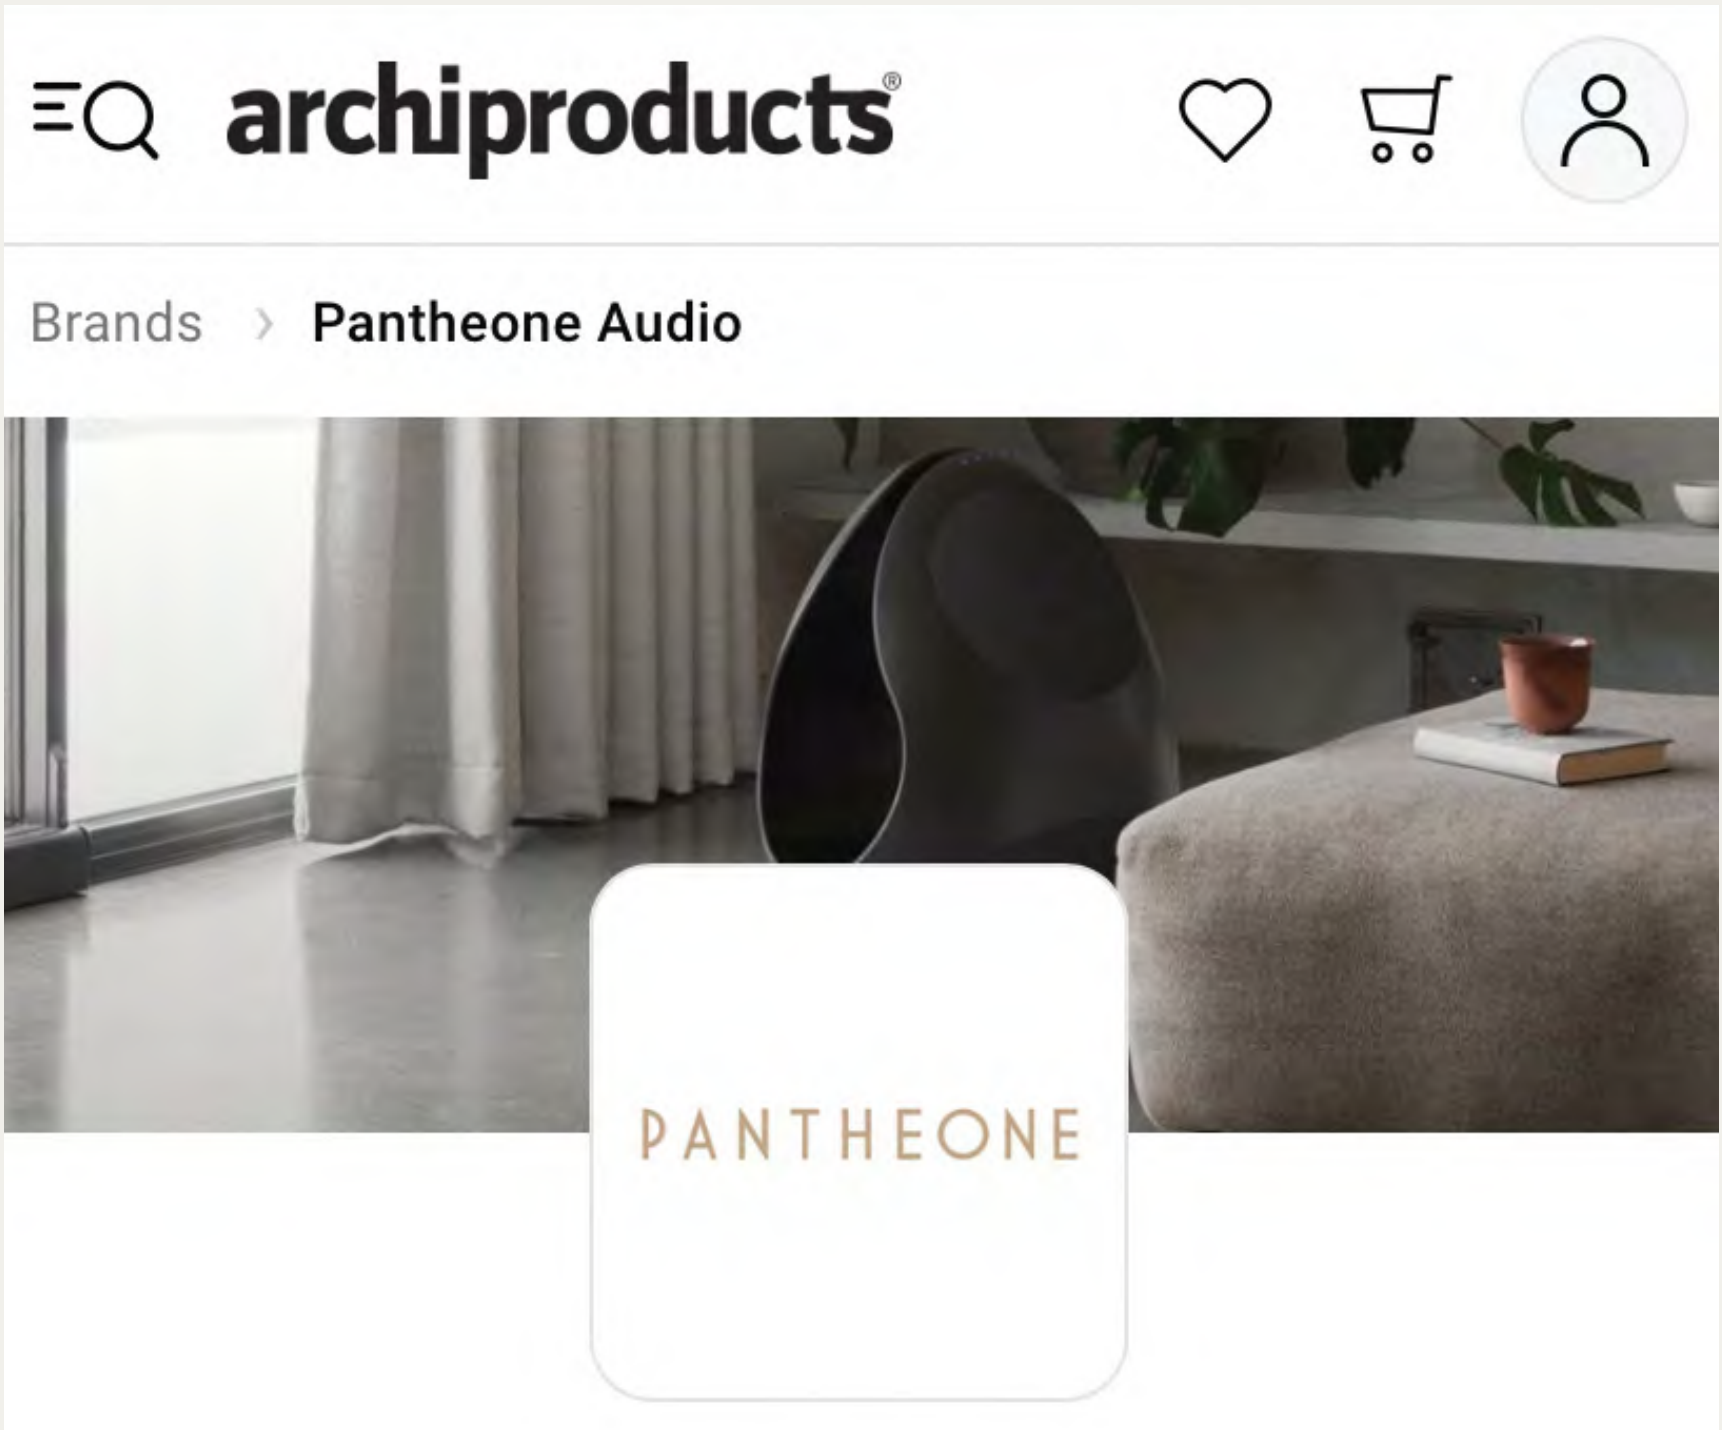

AWWWARDS.

www.pantheoneaudio.com was awarded for the design and development of its user-interface and experience by Awwwards, which recognises the best developers, designers and web agencies around the world.

REDDOT AWARDS.

“Pantheone I captivates with its sculptural design, which makes it an exceptional art object and the highlight of any room.”

ARCHIPRODUCT.

“The Pantheone speaker is a unique proposition that offers both visual and audio quality. As a work of, art it has an under stated elegance that would exist even if there wasn’t a speaker under the hood.”

Features

Press Play

Download the Pantheone App to to turn your phone into a remote control and access your multi room sound system's fantastic features - voice control, multi room player, sleep mode and more.

Multi Room

Create your own sound experience by placing multiple Pantheone Audio speakers in different rooms. Use the Pantheone app to synchronise the same music to play throughout or select different playlists for each room and individual Pantheone speakers. The choice is yours.

Streaming

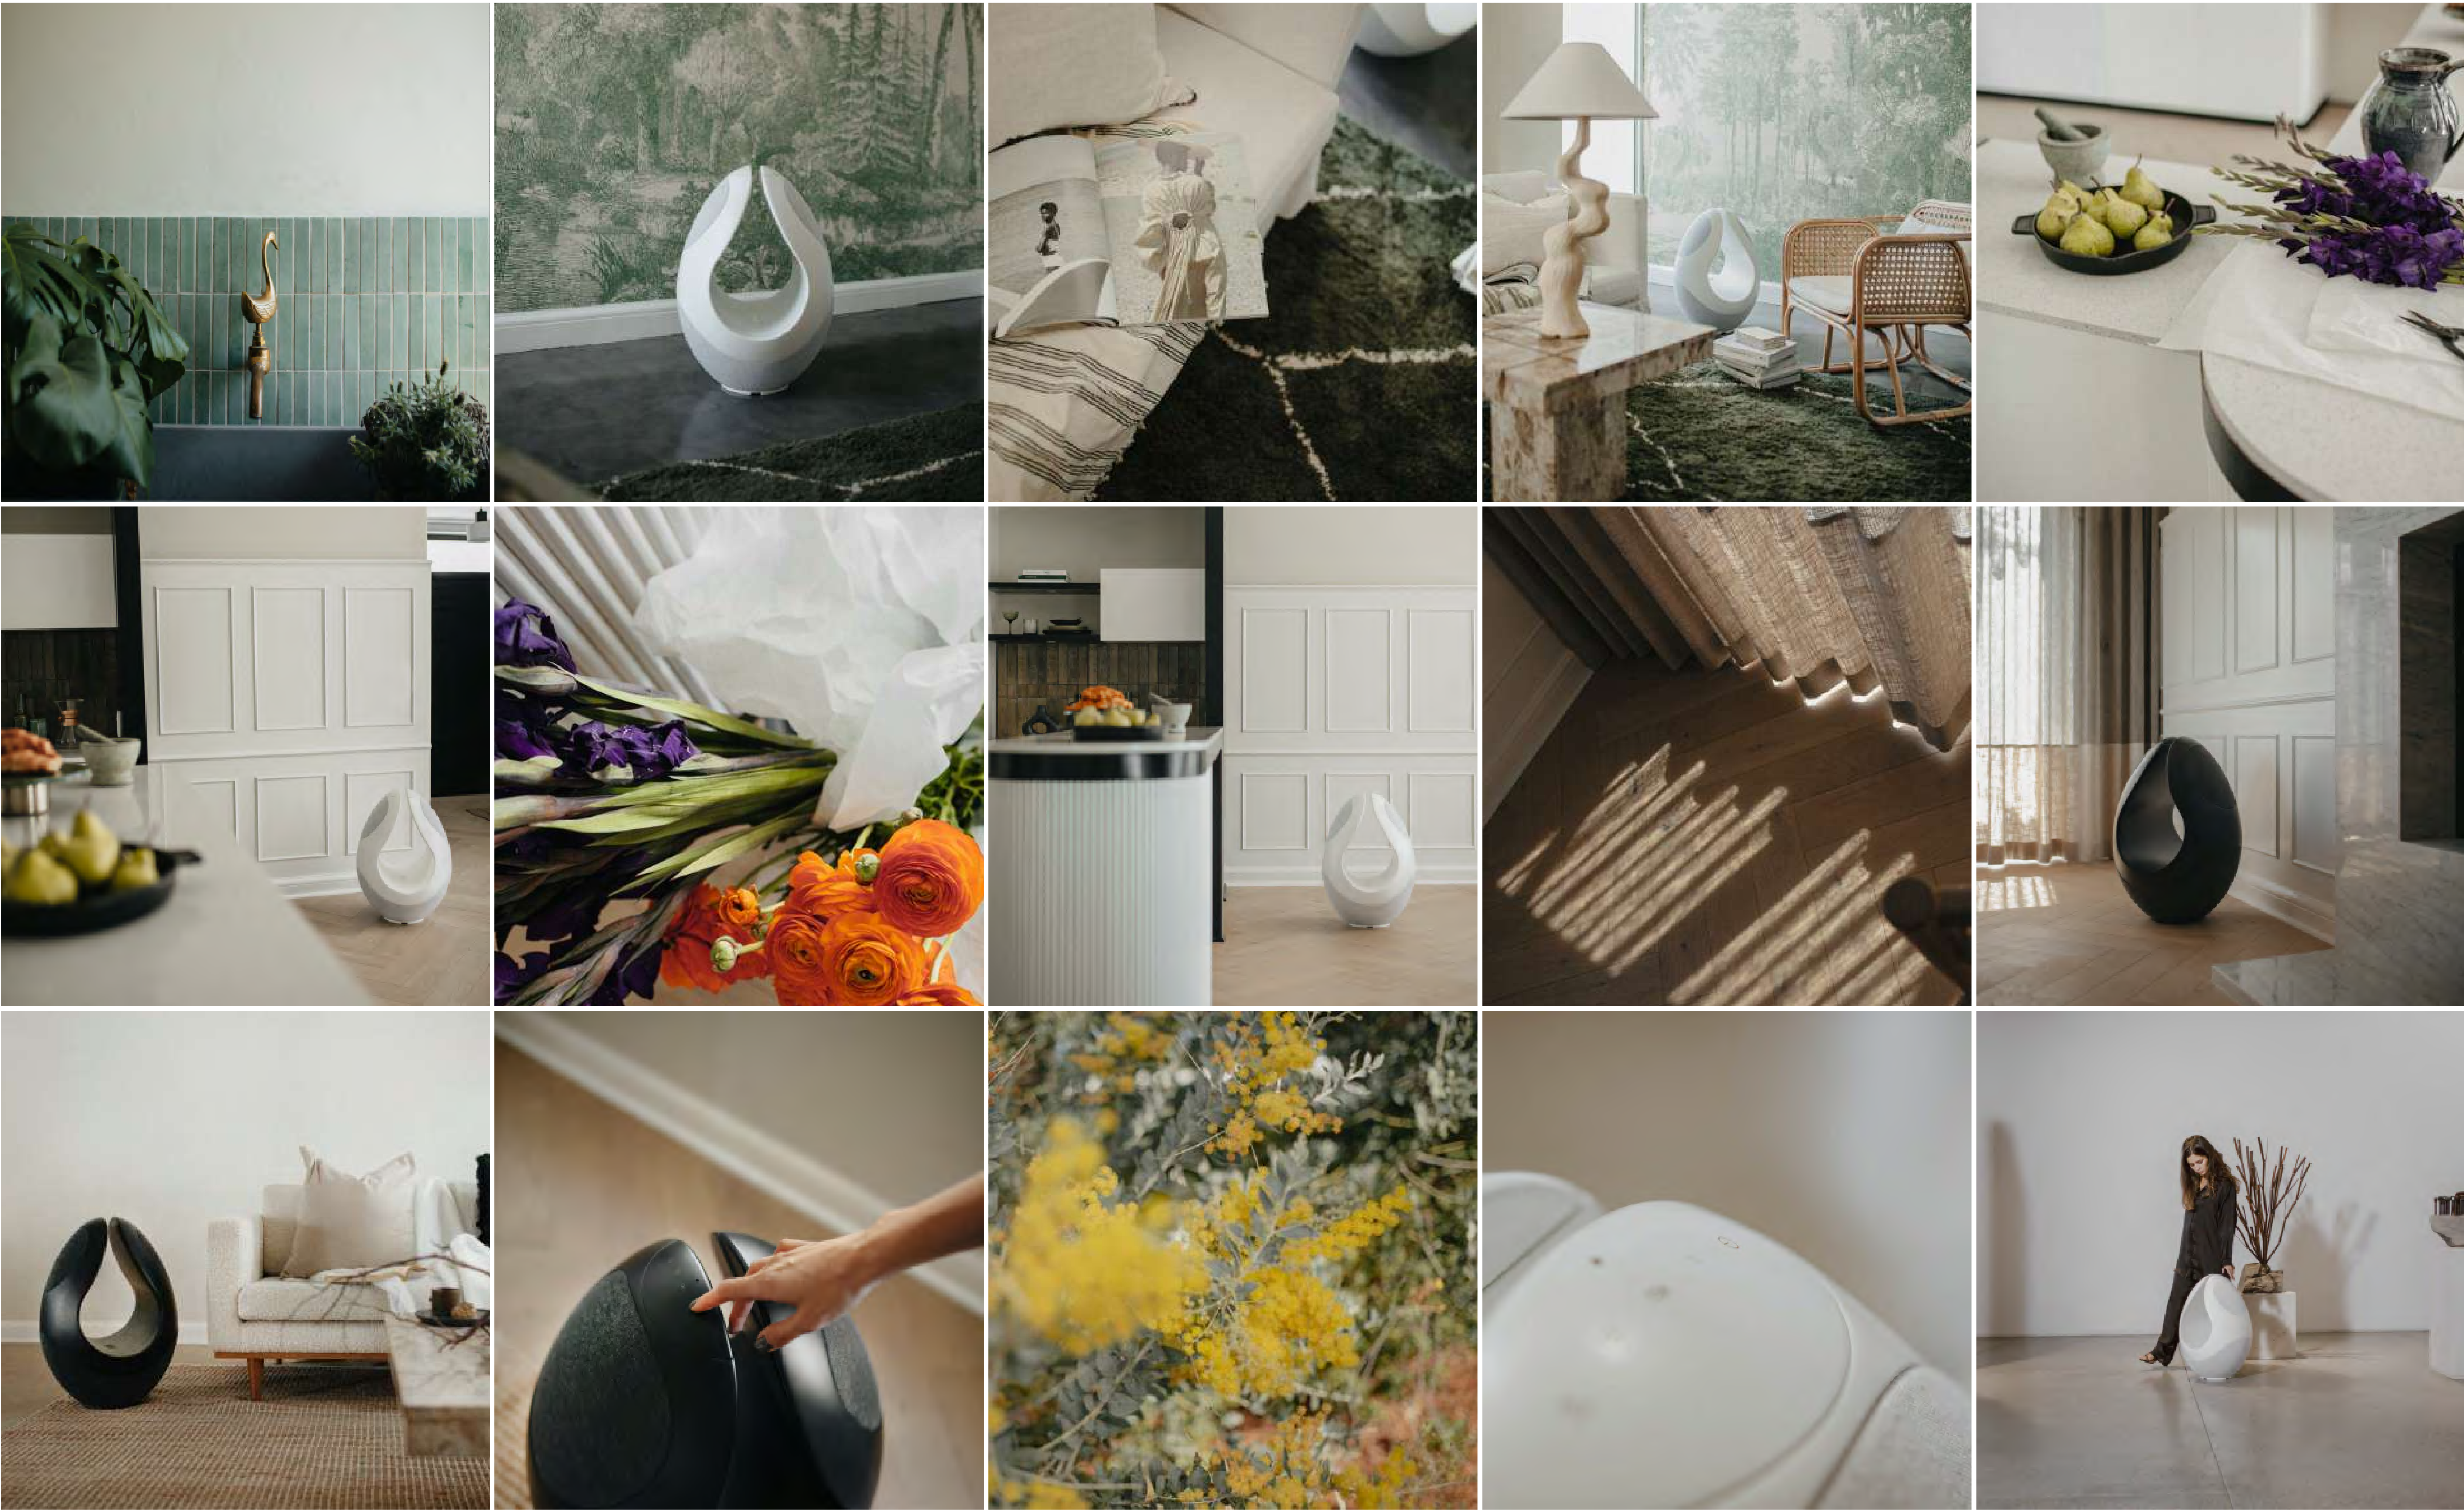

Access your favourite songs from one source. From Spotify, Amazon, iTunes, iHeart Radio, Tidal, Pandora or any other source, the Pantheone app allows you to organise and access all your music from one place. Whatever your music streaming choice, Pantheone I speakers will play it. Integrated with a wide selection of streaming services such as Amazon Music, Spotify, Tidal, Pandora and more.

Alexa Assistance

Listen to your favourite cooking playlist, set reminders and more, all the while busying yourself with the things and the people you love most. All thanks to the built-in voice controlled Amazon Alexa voice assistant.

“HELLO
ALEXA?” ...

Set your mind at rest.
With its smart timer and alarm feature, rest easy knowing that Pantheone has you covered,
at all times of the day, or night.
