

# Robotic Depalletizing

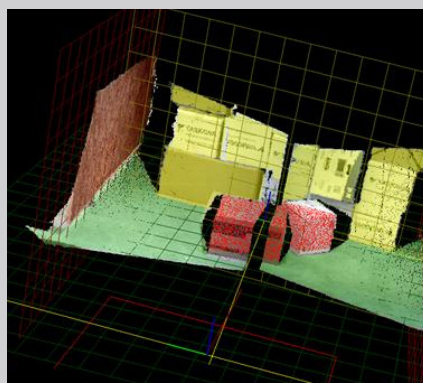

Wynright Robotics has been developing innovation robotic solutions for over 20 years. Our robotic depalletization products are designed to eliminate injuries, reduce product damage and increase rates. We offer full line design and simulation services that utilize the most modern technology and equipment. These systems reduce cost, and deliver exceptional reliability and uptime.

## Highlights:

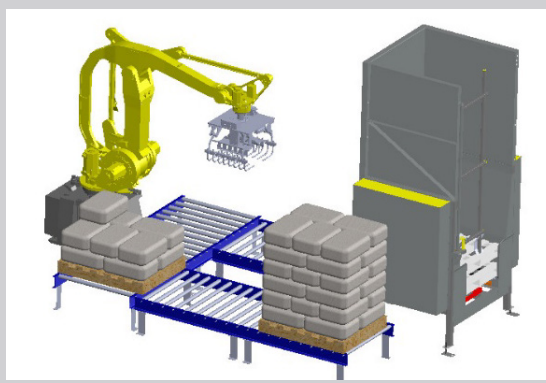

- Able to handle wide variety of products.
- Able to pick individual cases or full layers.
- Depalletizing rates up to 8 layers/min.
- Automated shrink wrap removal available.
- 24x7x365 Phone Support.
- Spare parts from Wynparts.com.
