FEATURING FLOORBED TECHNOLOGY

THE  
EMINENCE  
COLLECTION  
by Accora

“Every design  
begins with  
an even  
better story”

Lorinda Mamo, designer

## Your story

At last, a bed which is a true all-rounder, combining your clinical, operational and design must-haves.

Your choice of nursing bed doesn't have to be a compromise. Even with the diverse demands of clinical care, staff and resident safety, robustness and stylish design – we've managed to bring these all together in our new **Empresa™** bed.

A bed for all.

## Nursing beds transformed

First impressions count when it comes to attracting new residents. Looks play a huge part in making a home feel 'right' and just because specialist beds might be needed, it doesn't mean they can't be beautiful. With lots of options to choose from, our [Empresa](#) bed is a perfect partner for your design.

Working with our highly experienced team, we'll craft a centrepiece for you to be proud of – and help you create gorgeous spaces for people to live in.

[Be inspired.](#)

# Exceptional safety

Accora has been helping make care safer since its inception. Our class beating FloorBed® technology brings proven effectiveness in bed falls and injury prevention<sup>1</sup>, re-defining expectations of a floor level bed.

With falls as the leading cause of death and serious injury in older people<sup>2</sup>, FloorBed technology can play an important role in falls management in term care settings. And where residents need extra protection, the addition of a high safety mat can help reduce risk even further, by transforming a potential fall into a simple roll.

Falls within the bedroom were reduced by 80% and falls from the bed were eliminated.<sup>1</sup>

Lowers to 3.9"

High safety mat

## Summary of product evaluation results

Description	Baseline	Post FloorBed	Trend
Residents who fell	9 (of 12)	5 (of 12)	▼ 44%
Falls in bedroom space (exc. bath)	15	3	▼ 80%
Notable injury and/or required diagnostic/medical intervention	2	0	▼ 100%
Falls from the bed	7	0	▼ 100%

## Exceptional care

Caregiving is now complemented by the introduction of our dynamic **BodyMove™** system, helping form part of your first line of defense against tissue damage.

When moving from a supine to sitting position in bed, the body naturally lengthens. **Empresa's BodyMove** auto-regression feature accommodates this change, so not only does it help with pressure distribution, it helps improve comfort too. With all essential clinical features to aid safe nursing and residents' independence, the **Empresa** bed has people at the heart of its design.

Test results showed a 23% reduction in average pressure over the sacral area with the Empresa BodyMove technology, when compared to a standard nursing bed.<sup>3</sup>

“Good design can make the world of difference to how a resident, carer or relative will feel...”<sup>4</sup>

Jacqui Smith, interior designer

# Ergonomic handling

A comfortable to hold handset with a simple one-touch operation, activates pre-programmed care and comfort positions, as well as other profiling options. And with safety top of mind too, there is a lockout function to prevent unauthorized and inadvertent use, and an auto safety stop, inhibiting the bed from being lowered to below 8". A double-button press is needed to lower the bed to the floor.

Helping ensure effortless maneuverability and even greater levels of safety, the **Empresa** bed also comes equipped with eight castors and our **UniSafe™** braking system. Moving the bed around the room couldn't be easier and it takes only a single press of a pedal to secure each set of brakes.

Putting you in control.

Handset

Full nursing height 32"

42" width adjustment

Built-in length extension

## Ultimate flexibility

Everything you need in just one bed. Built-in adjustability gives the option to vary dimensions and a wide range of universal accessories allows you to utilize your assets fully, even when the profile of your resident changes. Combined with less risk of downtime, streamlined procurement and reduced training needs, the [Empresa](#) bed deserves a closer look.

And clinical functionality supports nursing care when needed, with full height adjustment for caregiver safety – all packaged in a choice of eye-catching and customized designs to help showcase your home.

Making life simpler.
