# TreeTrust

## About TreeTrust

We are active in fighting climate change. We facilitate new climate projects of highest quality for enterprises and create trust with transparency. We focus on carbon removal by scaling up the restoration of tree cover through mechanisms of the carbon markets. TreeTrust facilitates the generation of new forests for enterprises, using our expertise in asset structuring, risk assessment and mitigation, climate modeling, and forestry. We have already started projects building >1.000 ha new forests, sequestering more than 600.000 tCO<sub>2</sub> in the next years. With you, we want to scale these activities to help solving the climate crisis with highest quality projects and apparent climate benefits.

## We offer:

- Engagement in a central climate change topic - 100% purpose on restoring tree coverage
- Work in a creative environment that gives you a wide decision autonomy to shape our engagement within an international setting
- We grow - and you grow with us
- Flexible work environment(s): onsite in Munich / remote
- Participation in the success of our business
- The combination of strength and stability of an international reinsurance company with the spirit, flexibility and agility of a startup
