Reggora   **Byte**Software

Manage every appraisal order from BytePro

Reduce cycle times, impress borrowers, and lead the change to appraisal modernization — all without leaving your LOS.

Reggora seamlessly integrates with BytePro by Byte Software. This allows you to run every appraisal order through one efficient process inside your LOS. Reduce cycle times, improve your borrower experience, and empower your loan officers with BytePro's premier appraisal management solution.

Reggora is seamlessly integrated into BytePro via API. This secure, scalable approach allows you to access the platform's key functionality right inside your LOS. Automatically trigger orders, instantly transfer all appraisal documents and data back into BytePro, give LOs visibility into each of their orders, and much more. The integration is compatible with both BytePro Online and BytePro Enterprise and is customizable to meet your organization's unique needs.

With Reggora and BytePro, you can

- Trigger orders through automated, customizable milestones

- Automatically transfer documents back into BytePro and update data into the loan file

- Automate appraisal payments and trigger payment based on customizable milestones

- Turn LOs into trusted advisors by keeping them informed on every order

- Directly place orders with your appraisal vendors
  (Reggora has tens of thousands of appraisers and over 100 AMCs on the platform. With a completely open API, Reggora handles all vendor interaction.)
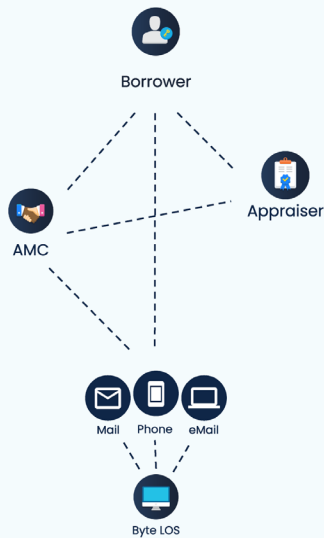

Benefits
- Reduce your cycle times
- Reduce your cost per loan
