GDPR Privacy Compliance Services

Regulatory services:

GDPR Training

Understanding the GDPR and building awareness are key for a life science company starting a GDPR compliance system. iliomad's unique expertise in data privacy applied to medical research allows to train management, clinical operations and IT teams.

Data Protection Impact Assessment (DPIA)

Data Protection Impact Assessments (DPIA) are mandatory when health data are being processed. iliomad supports life sciences companies with this compliance obligation.

GDPR Policies and Processes

The GDPR requires any company processing sensitive data to document this processing. iliomad provides a set of policies and processes allowing to fulfill this commitment.

Audit & Due diligence

The GDPR has impacts on a number of legal documents. This is particularly true in the life sciences sector. iliomad helps assess and review contracts (sites, vendors) and regulatory documents (main and local ICF).

Document Review

Appointing a Data Protection Officer is mandatory for some organisations. iliomad can act as an external DPO and help build a GDPR compliant system.

Data Protection Officer

Appointing a Data Protection Officer is mandatory for some organisations. iliomad can act as an external DPO and help build a GDPR compliant system.

Data Protection Representative

Appointing a data representative is mandatory for companies based outside of the European Economic Area (EEA). iliomad, through its European offices, acts as the European Data Representative where data of european citizens are processed.

Privacy **Services**

European Local Regulations

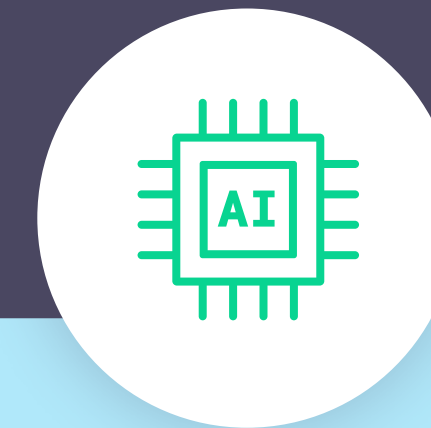

In life sciences and in Europe GDPR is not all. Local regulations and sectorial laws also apply. We help you understand this complex framework and guide you through it.

HIPAA, PIPEDA & CSL

Privacy is now global and having a holistic approach to it is paramount. We help our clients through gap analysis with the main privacy regulations:

- UK **GDPR**
- US: **HIPAA**
- Canada: **PIPEDA**
- China: **CSL**

Artificial Intelligence (AI)

Life sciences companies developing AI algorithms are facing important challenges from a privacy perspective. We help them understand the regulatory landscape in order to facilitate their go to market.

Cybersecurity

In order to have privacy, data need to be protected. iliomad provides cybersecurity services such as pentesting, audit and management crisis.

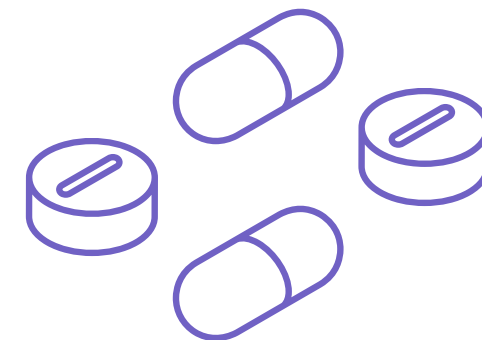

Our Expertise

— Data privacy expertise for innovative life sciences:

1

Drugs

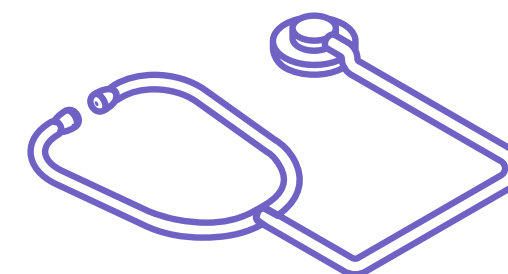

We support pharmaceutical companies and biotechs conducting clinical trials in Europe to abide with European and local privacy regulations.

2

Medical Device

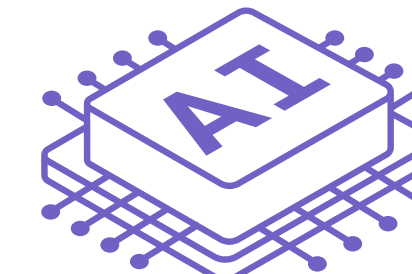

We support Medical device companies seeking CE marking (IIb -II) with privacy assessments and regulatory services.

3

AI

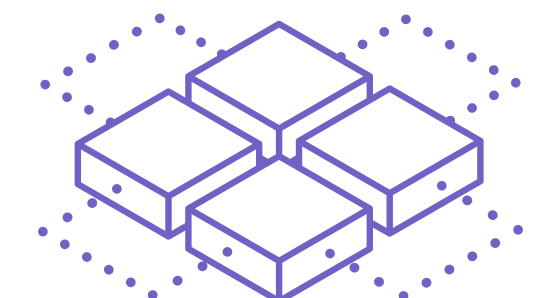

We help health AI companies assess the impact of their algorithms through conformity assessments.

4

Data Warehouse

We help life sciences companies obtain approval from data authorities for building data warehouses.

The First Privacy Platform for Life Sciences Privacy Professionals

A unique platform:
**“My data privacy
programme”**

iliomad’s platform is tailor made
for privacy professionals operating
in life sciences.

It encompasses features that
allow to bring into conformity
any processing activities, whatever
the domain: AI, clinical trial, data
warehouses.

It also features exclusive data
guidance per country to help
privacy professionals during
their compliance journey.
