

## SiMplicity Models

### Portable Neurovascular Silicone Vessels for Device Training & Demonstration

SiMplicity models are made up of custom neurovascular vessels configured to support plates. These support plates allow for the models to be readily available as needed, wherever you may be. Beyond its lightweight, portable design, SiMplicity proves to add a powerful visual experience to sales training and device demonstrations through its high-fidelity silicone vessels. These vessels exhibit matched dimensions and feedback to those of real vessels.
