(Portfolio Link tbd)

I decided to shift my career way to a more creative tech focused area. I am a problem solver and because of my past diverse work background, I learned how to deal with unusual problems and find solutions for them and work in a team with people from different cultures. So based on my abilities and interests I chose UX Design. I did a Full-time UX Design Bootcamp incl. design thinking, user research & requirements, UI design, prototyping, development handoff, usability testing & UX management.
