

# PlanStudio<sup>®</sup>

Agile creation and modification of floorplans with spatial accuracy and data entry and tracking on any asset within a building.

## What is PlanStudio?

|                               |  |
|-------------------------------|--|
| <b>Who is it for?</b>         | Building owners or their representatives that provide ongoing services to occupants and their tenancies.   |
| <b>What do they need?</b>     | Who require indoor mapping with control over internal assets and occupant safety.  |
| <b>Why is it needed?</b>      | For exacting location information, evacuation diagrams, safety documentation and compliance records.   |
| <b>What is it?</b>            | PlanStudio is an information powerhouse that modernises conventional drafting by merging indoor mapping software with safety information and asset tracking.                     |
| <b>What are the benefits?</b> | PlanStudio allows agile creation and modification of floorplans with spatial accuracy and tracking on any asset within a building.   |
| <b>How is it different?</b>   | Unlike traditional CAD-based drafting applications, PlanStudio allows users to have control over building data and streamline the entire drafting process saving time and money. |

## Key Features

Make one site visit and get the job done. PlanStudio guides you in collecting the information required to create your site's floor plans.

Automate orientation of evacuation diagrams according to the occupants view.

Identify the location of "you are here" points with one touch, have every single plan published and printed effortlessly.

Use PlanStudio to collect site specific details. Capture and store asset data like fire panel location, exit paths and equipment photos in their real world location on your floorplan.

Overlay your existing plan on a satellite layer and instantly scale with precise accuracy.

No existing plan? Use your iPad's LiDAR capability to visually scan the internals of your building. Drag and drop your scan onto a satellite layer to create a spatially accurate plan.

**Visual Equipment Register**

**Compliance**

**Data Capture**

**Evacuation Sign Publishing**

**Full Drafting Suite**

**API Integrations**
