

Make Amazing, Sustainable Products With Specright & COMPASS

Specright and COMPASS are partnering to transform the way companies approach sustainability, by making it easy to understand and track sustainability across the product and packaging development process.

Optimize for Sustainability at Any Stage of the Product Life Cycle

Put Sustainability at the Forefront of Product Development

Sustainability is often treated as an afterthought, causing companies to miss out on key sustainability optimizations. With Specright and COMPASS, product development data is analyzed in real-time, enabling companies to spot and act on sustainability opportunities such as materials substitutes, or SKU rationalization, instantly.

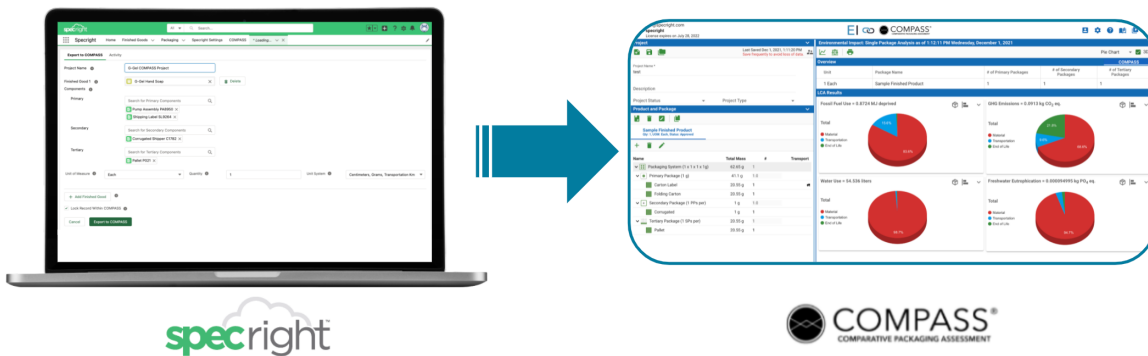

Conduct Faster, More Frequent Life Cycle Assessments

All the data you need in one place to perform an accurate Life Cycle Assessment. Constantly collect data and track progress over time.

Get Answers in Minutes, Not Months

Conduct real-time analysis and reporting. Say goodbye to waiting for quarterly or annual sustainability reports and act on the data you have today.

"Our partnership with Specright means companies can hit the 'easy button' and get the data they need to perform LCAs all the time, not just ad hoc. This enables data-driven decisions throughout a product's lifecycle when it comes to sustainability."

- Prashant Jagtap, Trayak President, Founder, & CEO
