Key Management

Manage and Maintain Logs and Records for Keys with a Smart Key Management Solution.

Organizations are increasingly focused on the solid security of their cyber-physical assets in this era of frequent breaches and lapses. Accessibility and accountability rely squarely on efficient key management, and enterprises must utilize technological advancements to ensure that their premises and assets are always completely secure. A compromise of assets, data, and other tangible and intangible resources can cause organizations major difficulties in the form of financial losses, reputational losses, and compliance failures.

Today, enterprises must adopt new-age assets and facilities management tools to keep their locks and keys safe and from malicious intentions .

Ensure complete security and grant only credential-based access by managing and maintaining exhaustive records on the keys in use within the organization.

TMA Systems' Key Management module helps enterprises efficiently manage their locks, keys, cores, and cylinders. It easily manages vital security information concerning key holders and key access. With the help of Key Management, enterprises can effectively track the various keys to rooms, equipment, vehicles, tools, and other assets. Additionally, the module tracks information related to audit trails for locks, cores, cylinders, bittings, keys, key rings, and key holders.

The Features

Easy tracking of all essential key data

Maintenance of a comprehensive log of keys created, issued, lost, and destroyed

Maintenance and management of records on bitting, serialized and non-serialized keys, key holders, and historical and real-time data

Easy tracking of misplaced keys, keys by department and function, and key rings

Fast issuance of keys for various assets

End-to-end visibility and control of bittings and user security-based access

Management of master keys, sub-master keys, and key holders

Fast replacement of locks and keys upon damage or loss

Report generation on key access information, bitting, repair, and replacement costs

The Benefits

Ensure end-to-end security for users and assets

Increase the life of locks, keys, key rings, cores, and cylinders

Enjoy holistic visibility of keys and their holders

Seamlessly assign keys as per user credentials and needs

Avail a unified dashboard for all information related to keys within the organization
