

Introducing consignMAX

Automated Consignment

Increase profits and reduce stress with consignMAX from Storeroom Logix. Based on the input from a distributor focus group, Storeroom Logix is changing how consignment is managed.

11 Ways consignMAX increases your profit:

- 1 **API Integration** - Automate consignment related transactions like billing, transfers and cycle count using API integrations
- 2 **Setting Configurator** - Customize each step of your consignment workflow for your entire company or edit the process at the ship-to level
- 3 **Consolidated Invoicing** - batch submit daily, weekly, or bi-weekly
- 4 **Sort Invoices by allocation codes** – work order, job name, project...
- 5 **Audit Trail** – Automatically track who, what, where and when
- 6 **Mix consigned and non-consigned parts**
- 7 **Instant billing** - when customers use SRX checkout software
- 8 **SRX Equipment** - controls access
- 9 **Consumption, replenishment, and invoicing** - are all separate functions
- 10 **Return restrictions** - Parts cannot be returned after audit
- 11 **Analytics on profitability**
