

# Introducing **Phil**

Your New and Improved VMI  
App from Storeroom Logix

With  **BRADY** Integration

## Revolutionizing Your VMI Re-Order Process

### 5 all-new features that separate Phil from the competition

- 1 Offline Mode** - Phil keeps you productive no matter where you are. Work all day, even in areas with no cell service. Submit replenishment requests when it's convenient for you, and they'll sync when you're back online.
- 2 Label Printing** - Have you ever been on-site at a customer's facility and need a label NOW? Phil let's you print labels whenever and wherever you need with our new [Brady M211 and M511 portable bluetooth label printer integration.](#)
- 3 Mobile Orders** - Track the progress of all open orders and provide your customers with the answers they need—right from the palm of your hand. No more turning on that laptop to keep everyone informed.
- 4 Spot Buy** - The part isn't on your customer's VMI list? No problem! Phil helps you search your entire product catalog and create on-demand orders straight into your ERP.
- 5 Multi-Scan** - Open Phil - click scan - start creating orders. No need to tell us what ship-to you're at... Just Point, Scan, Replenish. While your camera is open, scan as many items as you can. Phil sorts everything and submits when it's convenient for you. Less clicks - more efficient.
